DEPARTMENT OF ENVIRONMENTAL AFFAIRS

NO. 1109

19 OCTOBER 2018

NATIONAL ENVIRONMENTAL MANAGEMENT: BIODIVERSITY ACT, 2004 (ACT NO. 10 OF 2004) DRAFT THE NATIONAL BIODIVERSITY FRAMEWORK

I, Derek Andre Hanekom, Minister of Environmental Affairs (Acting) hereby publish in terms of section 38 of the National Environmental Management: Biodiversity Act, 2004 (Act No 10 of 2004), a draft biodiversity National Biodiversity Framework, as contained in the schedule hereto.

Members of the public are invited to submit to the Minister, within 30 (thirty) days after the publication of the notice in the *Gazette*, written representations on, or objections to the National Biodiversity Framework to the following addresses:

By post to: The Director-General:
Department of Environmental Affairs
Attention: Ms Pamela Kershaw
Private Bag X447
Pretoria
0001

By hand at: Ground Floor (Reception), Environment House, 473 Steve Biko, Corner Steve Biko and Soutpansberg Road, Arcadia, Pretoria, 0001

By e-mail: pkershaw@environment.gov.za, or by fax to 0865411102 or 012 399 9585.

All inquiries in connection with the notice can be directed to Ms Pamela Kershaw at 012 399 9585.

An electronic copy of the draft NBF can be downloaded from the following link:
<http://www.environment.gov.za/Documents/>.

Comments received after the closing date may not be considered.

**DEREK ANDRE HANEKOM
MINISTER OF ENVIRONMENTAL AFFAIRS (ACTING)**

THE DEPARTMENT OF ENVIRONMENTAL AFFAIRS

2747809NBF 2018.docx

2017 - 2022

This National Biodiversity Framework is submitted in fulfilment of the requirements of the National Biodiversity Management: Biodiversity Act (Act 10 of 2004), Section 38(2)

National Biodiversity Framework

Section 1: Introduction to the National Biodiversity Framework

The National Biodiversity Framework (NBF) is a requirement under Section 38 of the **National Environmental Management: Biodiversity Act** (Act 10 of 2004, hereafter referred to as the 'Biodiversity Act').

1.1 Purpose of the NBF

The overall purpose of the NBF is to **coordinate and align** the efforts of the many organizations and individuals involved in conserving and managing South Africa's biodiversity in support of sustainable development.

The Biodiversity Act specifies that the NBF must:

- provide for an **integrated, co-ordinated and consistent approach** to biodiversity management
- identify **priority areas** for conservation action, and for the establishment of protected areas
- reflect **regional cooperation** issues concerning biodiversity management in Southern Africa.

The NBF is a short to medium-term coordination tool that shows the **alignment** between the strategic objectives and outcomes identified in the National Biodiversity Strategy and Action Plan (NBSAP v.2, 2015) and other key national strategies, frameworks and systems that currently guide the work of the biodiversity sector, and identifies mechanisms through which this work is **coordinated**. It also identifies a set of interventions or "acceleration measures" that can unlock or fast-track implementation of the NBSAP, and indicates the **relative roles** of the many agencies involved in implementing these activities.

The purpose of the NBF is not to provide a comprehensive review of all work currently being undertaken in the biodiversity sector, nor to list all of the actions required to conserve and manage South Africa's biodiversity in support of sustainable development.

1.2 Informants of the National Biodiversity Framework

The primary informants of the NBF are the latest versions of the **National Biodiversity Strategy and Action Plan** (or NBSAP), which is South Africa's long-term strategy for ensuring sustainable management, use and conservation of biodiversity; the **National Biodiversity Assessment** (or NBA), which provides headline indicators and a spatial assessment of ecosystems and species; and, the **National Protected Areas Expansion Strategy** (or NPAES), which is a long-term strategy for guiding cost-effective expansion of the country's protected area estate. The NBF is also informed by numerous other national strategies, frameworks and systems (and their provincial counterparts, where these exist) that guide the work being carried out in the biodiversity sector – an overview of these is presented in Section 3 of this Framework.

1.2.1. Overview of the National Biodiversity Strategy and Action Plan (version 2, 2015)

An NBSAP is a requirement that all contracting parties to the Convention on Biological Diversity (CBD, 1992) are obliged to fulfil. South Africa's NBSAP 2015 sets out an integrated and coherent national strategy for the conservation, management and sustainable use of the country's biodiversity to ensure equitable benefits to the people of the country. It outlines how South Africa will fulfil the objectives of the CBD and contribute to the global sustainable development agenda. It also provides a framework for the integration of biodiversity considerations into national development plans and a wide range of other sectoral strategies, placing wise management and protection of biodiversity at the heart of the sustainable development agenda.

The NBSAP 2015 – 2025 (GoS, 2015a) identifies **6 strategic objectives**, under each of which key **outcomes, activities** (designated as high, medium and low priority), and medium to long-term **targets** are described in detail – see **Figure 1** for a summary of the strategic objectives, and **Table 1** for a more detailed listing of the outcomes.

The Department of Environmental Affairs (DEA) is responsible for coordinating and monitoring the implementation of the NBSAP, with the support of the environmental Minister and Members of the Executive Council (MinMEC) Committee, the Ministerial Technical Committee (MinTECHs) and their various Working Groups (WGs), in particular WG 1 (Biodiversity and Conservation) – these are described in more detail in Section 4 of this document.

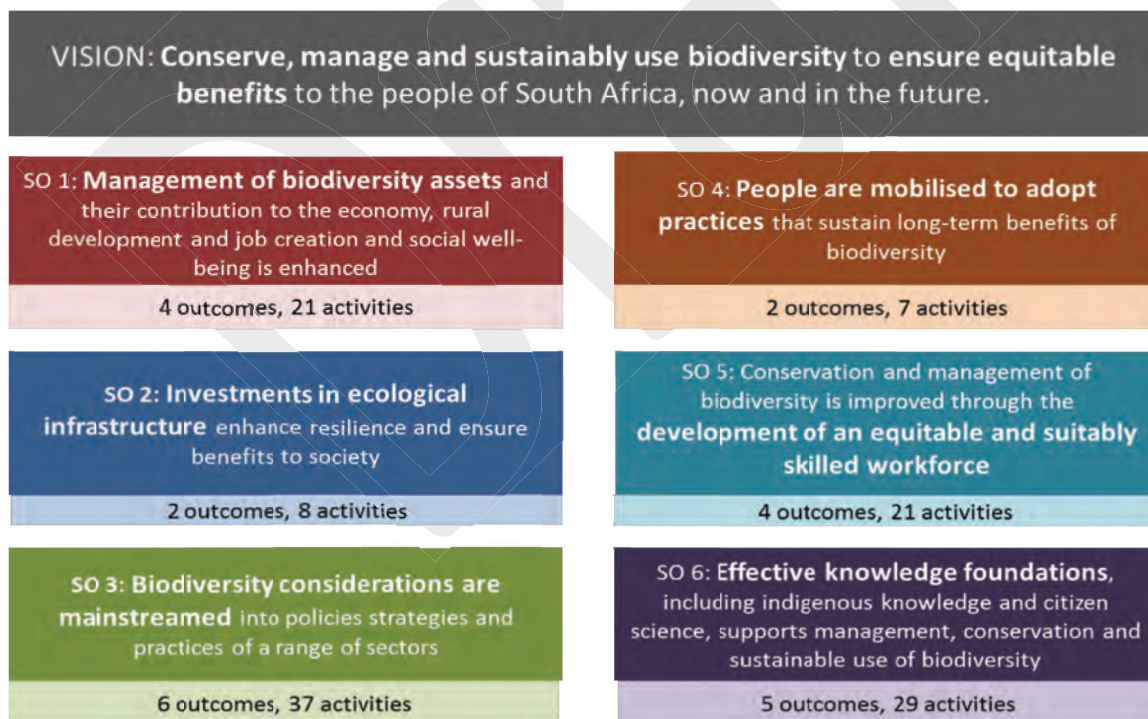

Figure 1: Summary of the six strategic objectives described in the NBSAP 2015 - 2025

Table 1: Core strategy of the NBSAP 2015 to 2025

Strategic objectives	Outcomes
1. Management of biodiversity assets and their contribution to the economy, rural development, job creation and social well-being is enhanced	1.1. The network of protected areas and conservation areas includes a representative sample of ecosystems and species, and is coherent and effectively managed. 1.2. Species of special concern are sustainably managed. 1.3. The biodiversity economy is expanded, strengthened and transformed to be more inclusive of the rural poor. 1.4. Biodiversity conservation supports the land reform agenda and socio-economic opportunities for communal landowners.
2. Investment in ecological infrastructure enhances resilience and ensures benefits to society	2.1. Restore, maintain and secure important ecological infrastructure in a way that contributes to rural development, long-term job creation and livelihoods. 2.2. Ecosystem-based adaptation (EbA) is shown to achieve multiple benefits in the context of sustainable development.
3. Biodiversity considerations are mainstreamed into policies, strategies and practices of a range of sectors	3.1. Effective science-based tools inform planning and decision-making . 3.2. Embed biodiversity considerations into national, provincial and municipal development-planning and monitoring . 3.3. Strengthen and streamline development authorisations and decision-making . 3.4. Compliance with authorisations and permits is monitored and enforced. 3.5. Appropriate allocation of resources in key sectors and spheres of government facilitates effective management of biodiversity, especially in biodiversity priority areas. 3.6. Biodiversity considerations are integrated into the development and implementation of policy, legislative and other tools.
4. People are mobilised to adopt practices that sustain the long-term benefits of biodiversity	4.1 People's awareness of the value of biodiversity is enhanced through more effective coordination and messaging. 4.2 People are mobilised to conserve and sustainably use biodiversity.
5: Conservation and management of biodiversity is improved through the development of an equitable and suitably skilled workforce	5.1. Macro-level conditions enabled for skills planning, development and evaluation of the sector as a whole. 5.2. An improved skills development system incorporates the needs of the biodiversity sector. 5.3. Partnerships are developed and institutions are capacitated to deliver on their mandates towards improved service delivery.
6: Effective knowledge foundations , including indigenous knowledge and citizen science, support the management, conservation and sustainable use of biodiversity	6.1. Relevant foundational data sets on species and ecosystems are in place and well-monitored and available to the public in a useful format. 6.2. The status of species and ecosystems is regularly monitored and assessed and communicated. 6.3. Geographic priority areas for the management, conservation and restoration of biodiversity assets and ecological infrastructure are identified based on best available science. 6.4. Management-relevant and policy-relevant research and analysis is undertaken through collaboration between scientists and practitioners. 6.5. Knowledge base is accessible and presented in a way that informs decision-making .

1.2.2. Overview of the National Biodiversity Assessment

The purpose of the National Biodiversity Assessment (NBA) is to assess the state of South Africa's biodiversity based on best available science, with a view to understanding trends over time, and informing policy and decision-making across a range of sectors. The NBA is a product of high scientific importance, developed through a five-year process of research and consultation that is led by the South African National Biodiversity Institute (SANBI), working in collaboration with DEA and several other partner organizations. The NBA deals with all three components of biodiversity (genes, species and ecosystems), and assesses biodiversity and ecosystems across terrestrial, freshwater, estuarine and marine realms. The NBA is a primary informant of the NBSAP, the National Protected Areas Expansion Strategy (NPAES, and its provincial counterparts), provincial and metropolitan systematic biodiversity plans, bioregional plans, and other biodiversity and spatial planning tools. It also links closely with the developing National Biodiversity Monitoring Framework (see **Table 4, Section 3.1**), which establishes a consistent set of headline biodiversity indicators for the country, including ecosystem threat status and ecosystem protection level. The NBA provides spatial focus and impetus for taking forward a programme of work to measure these indicators, and synthesises them periodically at the national scale.

The NBA 2018 (to be published in 2019) follows from the National Biodiversity Assessment 2011 (which informed the NBSAP 2015). Both of these were preceded by the National Spatial Biodiversity Assessment (NSBA, 2004), which informed the NBSAP 2005. The NBA process culminates in the publication of a Synthesis Report, a popular report (which makes the results available to non-specialists), a number of technical reports, peer-reviewed papers in journals, data and metadata – all of which are made publicly available.

1.2.3 Overview of the National Protected Areas Expansion Strategy

The goal of South Africa's National Protected Areas Expansion Strategy (NPAES) is to achieve cost-effective expansion of the protected area estate for improved ecosystem representation, ecological sustainability, and resilience to climate change. It sets national protected area targets, maps priority areas for protected area expansion, and makes recommendations on mechanisms for achieving the targets, under both the **National Environmental Management: Protected Areas Act** (Act 57 of 2003, hereafter referred to as the 'Protected Areas Act.') and the Biodiversity Act. The common set of targets and spatial priorities provided in the NPAES enable co-ordination between the many role-players involved in protected area expansion. Detailed spatial planning and roll-out to achieve the protected area targets is carried out at provincial level, guided by provincial systematic biodiversity plans and protected area expansion strategies, where these exist (DEA, 2016a¹).

Provision is made for the NPAES to be updated every five years. The first NPAES, which was published in 2008, has recently been revised to: include new biodiversity data and newly-declared protected areas, and information from provincial biodiversity plans and protected area strategies; improve target-setting; and, inform the identification of priority areas for expansion. The revised NPAES (DEA, 2016a) also includes a review of the performance of protected area management authorities with

¹ At the time of writing, the revised NPAES had yet to be signed off by the Minister.

regard to protected area expansion in the period 2008 to 2014, and describes priority activities, with explicit performance targets, for the period 2016 to 2020 (DEA, 2016a).

1.3 Overview of the National Biodiversity Framework

South Africa's first National Biodiversity Framework (**Government Gazette Vol. 530, GN No.32474, 3 August 2009**) was based on the first NBSAP (DEA, 2005), and the National Spatial Biodiversity Assessment (NSBA 2004). It identified a set of 33 high priority activities to guide the work of the biodiversity sector over the period 2008 to 2013. The NBF, along with the updated National Biodiversity Assessment (NBA 2011), in turn, became an important informant in the process to update the first NBSAP, and has played an important role in guiding conservation action in the biodiversity sector.

Differences in the policy context prevailing now, compared to when the original NBF was developed, have made it necessary to take a different approach in the revised NBF. In particular, a range of national policies, strategies, frameworks and other systems is now in place – and others are being developed – to guide work in certain areas of the biodiversity sector, such as management of invasive species, protected area expansion, biodiversity stewardship, ecosystem-based adaptation, the biodiversity economy, and water resource management. Some of these strategies include detailed action plans (in which specific activities with targets, roles and responsibilities are identified), whilst others are more conceptual (outlining a broad approach or set of principles which should guide the development of more detailed implementation plans). The NBSAP makes reference to some of these strategies (those that were developed before 2015), and has identified priority actions that are well-aligned with them, but other strategies have been developed since, and there is a need to align these with priorities of the NBSAP, which is the 'umbrella strategy' for the sector.

For these reasons, and to achieve its primary purpose (which is to provide an integrated framework for coordinating the work of the biodiversity sector), the revised **National Biodiversity Framework** for the period 2017 to 2022 takes a two-pronged approach, which includes:

- **providing an overview of key national strategies, frameworks and systems** that guide the work of the biodiversity sector, and indicating their relevance to the strategic objectives, outcomes and priority activities of the NBSAP. This is complemented by an overview of key, national-level co-ordination mechanisms and communities of practice through which sector role-players can coordinate their work and exchange information and experiences.
- **identifying a set of interventions** (called 'accelerators') that can be used to **accelerate implementation** of high-level **priorities of the NBSAP** over the next five years.

In taking this approach, the NBF brings together key elements of the NBSAP and other relevant strategies. The NBF is underpinned by a strong scientific foundation (provided by the NBA, the NPAES and the research that underpins several of the other strategies included in the overview), and builds on the consultative processes through which all of these other products were developed.

Development of the revised NBF has been carried out through a thorough **analysis of the NBSAP and 30 other strategies, frameworks and systems**, and a **targeted consultation process** involving key stakeholders in government and civil society (with emphasis on those institutions that carry a government mandate to manage and protect biodiversity and other natural resources, and ensure

their sustainable use). The relationship between the NBF, NBSAP, NPAES and other key strategies is illustrated in **Figure 2**.

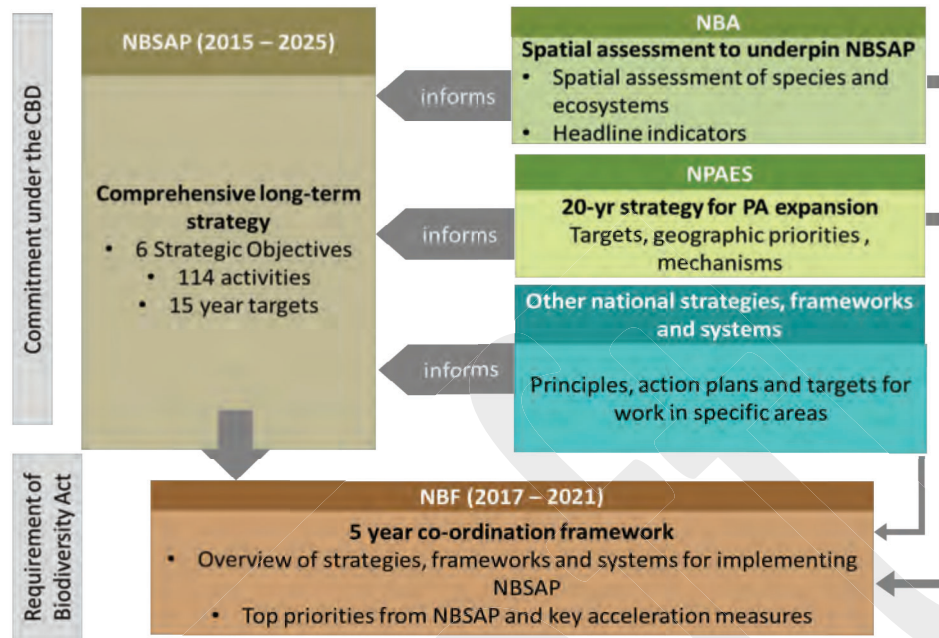

Figure 2: Informants of the revised National Biodiversity Framework

1.4. Users of the NBF

The primary users of the NBF are institutions whose **core business is biodiversity conservation and environmental management**. Broadly, the users may include: organs of state in national, provincial and local spheres; government-led programmes, such as those to restore and rehabilitate ecosystems; NGOs and CBOs; and, multi-stakeholder conservation and development programmes and projects, such as multi-partner landscape-level initiatives and other flagship projects (see **Table 2**, for a summary of the key role-players).

The NBF may also have some relevance for stakeholders whose core work is not biodiversity conservation, but whose business either impacts on the status of biodiversity and ecosystems, or depends on biodiversity assets, ecosystem services and ecological infrastructure – for example, sectors such as agriculture, fisheries, water and sanitation, mining, energy, rural development and land reform, urban development, local economic development, and education.

It also has relevance for government departments which are not responsible for direct or indirect management of natural resources, but play an important role in establishing policies and practices that impact on biodiversity management and conservation, and the implementation of the NBSAP (such as, the Presidency; National Treasury; Department of Co-operative Governance and Traditional Affairs (CoGTA); Department of Science and Technology (DST); Department of Trade and Industry (dti); the Departments of Basic and Higher Education (DoE); and, the Department of Arts and Culture (DAC).

Table 2: Key institutions directly involved in biodiversity management and conservation

Government Entities	
National departments and public entities	Provincial conservation agencies, parks boards or other conservation authorities
<ul style="list-style-type: none"> • Department of Environmental Affairs (DEA) • South African National Biodiversity Institute (SANBI) • South African National Parks (SANParks) • World Heritage Site Authorities • Department of Water and Sanitation (DWS) • Department of Agriculture, Forestry and Fisheries (DAFF) <p><i>Research entities</i></p> <ul style="list-style-type: none"> • The Council for Scientific and Industrial Research (CSIR) • The Water Research Commission (WRC) • The Agricultural Research Council (ARC) • The South African Environmental Observation Network (SAEON) 	<ul style="list-style-type: none"> • Western Cape: CapeNature • Kwazulu-Natal: Ezemvelo KZN Wildlife (EKZNW) • North West: North West Parks and Tourism Board (NWPB) • Eastern Cape: Eastern Cape Parks and Tourism Authority (ECPTA) • Limpopo: Limpopo Tourism and Parks Board (LTPB) • Mpumalanga: Mpumalanga Tourism and Parks Agency (MTPA) • Isimangaliso Wetland Park Authority <p><i>Note: CapeNature and EKZNW are mandated to work throughout their respective provinces, whereas the other parks authorities are mandated to work only within the boundaries of protected areas</i></p>
Provincial environment and/or conservation departments	Key government-led national environmental programmes
<ul style="list-style-type: none"> • Western Cape: Department of Environmental Affairs and Development Planning (DEA&DP) • Northern Cape: The Department of Environment Affairs and Nature Conservation (DENC) • Free State: Department of Economic Development, Small Business Development, Tourism and Environmental Affairs • Eastern Cape: The Department of Economic Development, Environmental Affairs and Tourism (DEDEAT) • KwaZulu-Natal: Department of Economic Development, Tourism and Environmental Affairs (DEDEAT) • Gauteng: Gauteng Department of Agriculture and Rural Development (GDARD) • Mpumalanga: Department of Agriculture, Rural Development, Land and Environmental Affairs (DARDLEA) • North West: Department of Rural, Environmental and Agricultural Development (NW READ) • Limpopo: Limpopo Department of Economic Development, Environment and Tourism (LEDET) 	<ul style="list-style-type: none"> • Working for Water (WfW) • Working on Fire (WoF) • Working for Wetlands (WfWet) • Working on Ecosystems (WonEco) • LandCare • Working for the Coast (WftC) • Community-based Natural Resource Management (CBNRM) • People and Parks Programme • Man and Biosphere Reserve Programme (MAB)
	Local governments
	<p>All local governments in South Africa (including Metropolitan, District and Local Municipalities) play an increasingly important role in spatial planning and land-use management (including biodiversity management and integrated environmental management). They also provide a strategic opportunity to mainstream biodiversity into sustainable development through the integration of nature-based opportunities (aligned with the NBSAP) into integrated development plans</p>
NGOs, the private sector, civil society	
<p>African Conservation Trust (ACT); BirdLife South Africa, The Botanical Society of Southern Africa (BotSoc); Conservation-South Africa; Endangered Wildlife Trust (EWT); IUCN in SA; Peace Parks Foundation (PPF), Wildlife and Environment Society of South Africa (WESSA); World Wide Fund for Nature South Africa (WWF-SA); Wildlands Conservation Trust; Wilderness Foundation; ICLEI; Biosphere Reserve management agencies; community-based organizations; businesses and other private sector role-players; landowners</p> <p><i>Note: These lists are not comprehensive and there may be many other organizations and programmes that play an important role in biodiversity conservation and to whom the NBF will be relevant.</i></p>	

1.5. Structure of the NBF

The NBF is presented in five Sections, as follows:

Section 1 provides an introduction to the NBF, including its purpose, its relationship to the NBSAP, NBA and other national strategies, its intended users, and its overall structure.

Section 2 describes the context for implementation of the NBF, including a brief description of key pressures on South Africa's biodiversity and opportunities for addressing these; the institutional context; alignment with national policies and international commitments under multilateral agreements; and, guiding principles.

Section 3, which is the core of the NBF, has two components: (i) an **overview of key national strategies, frameworks and systems** that guide the work of the biodiversity sector, and provide effective vehicles for implementing the provisions of the NBSAP; and, (ii) a brief description of **key acceleration measures** that can be used to remove bottlenecks or barriers or provide opportunities for fast-tracking implementation of high priority activities identified in the NBSAP. These measures include a combination of enabling and other types of activities, some of which are specific to particular strategic objectives of the NBSAP, and others of which are cross-cutting, and hold the potential to achieve multiple NBSAP objectives simultaneously.

The information in this section is presented in a combination of summary tables (organised under the Strategic Objectives and Outcomes of the NBSAP), accompanied by brief narrative description.

Section 4 deals with mechanisms for co-ordination and co-operation (including national and regional priorities), communities of practice for promoting collaboration and knowledge sharing, and implementation arrangements.

Section 5 is a set of annexures providing additional or supplementary information including references, a list of Sustainable Development Goals (SDGs) and Aichi Biodiversity Targets (ABTs), and a list of acronyms and abbreviations used in the document.

Section 2: Context for implementation of the NBF

2.1. Status of South Africa's biodiversity

South Africa is one of the world's most diverse countries in terms of ecosystems and species, with nine different terrestrial biomes (Fynbos, Grassland, Savanna, Nama Karoo, Succulent Karoo, Forest, Subtropical Thicket, Indian Ocean Coastal Belt, and Desert), a wealth of freshwater ecosystems, diverse marine ecosystems and a rich store of marine resources, and over 95 000 known species of living organisms. In addition to their own intrinsic value, these ecosystems and species are critical natural assets that provide a range of goods and services to people, such as producing food and clean water, regulating climate and disease, supporting crop pollination and nutrient cycles, and delivering cultural benefits and recreational opportunities. Maintaining the biodiversity assets and ecological infrastructure that provide these benefits in good ecological condition is fundamental to achieving South Africa's social and economic development objectives. A brief overview of the status of South

Africa's biodiversity and ecosystems is provided in **Table 3**. All of the information in the table has been extracted from the NBA 2011, unless otherwise stated.

Table 3: Status of South Africa's ecosystems and species, at a glance

Ecosystem/element	Status, at a glance
Terrestrial Ecosystems:	
<i>Ecosystem threat status:</i>	40% of ecosystem types are threatened, with highest proportion of threatened ecosystems in the Indian Ocean Coastal Belt, Grassland, Fynbos and Forest Biomes
<i>Ecosystem protection level:</i>	22% well-protected, 35% not protected at all
<i>Key ecosystem services:</i>	Rangelands; fertile soil; pollination; ecotourism; medicinal plants; wild food sources; resources for the wildlife and natural products industries; cultural, recreational and spiritual resources
<i>Main pressures:</i>	Intensive agriculture, urban sprawl, mining, poorly-planned land uses and irresponsible practices that cause habitat loss or land degradation, overgrazing, invasive alien plants
River ecosystems	
<i>Ecosystem threat status:</i>	57% of all river ecosystem types are threatened, half of these being critically endangered; 65% of mainstem rivers are threatened
<i>Ecosystem protection level:</i>	14% well-protected, 50% not protected at all; only 18% of Strategic Water Source (high water-yield) Areas are protected
<i>Key ecosystem services:</i>	Fresh water, South Africa's most scarce natural resource; food and other materials that support livelihoods
<i>Main pressures:</i>	Over-abstraction of water, pollution, loss of riparian vegetation; invasive species
Wetland ecosystems:	
<i>Ecosystem threat status:</i>	65% of wetland ecosystems are threatened (48% critically endangered)
<i>Protection levels:</i>	11% well-protected, 71% not protected at all
<i>Key ecosystem services:</i>	Water purification; flood regulation; natural resources for food and livelihoods
<i>Main pressures:</i>	Loss and degradation due to inappropriate land use; impoundments and other changes in water flow; pollution; invasive alien organisms
Estuarine ecosystems	
<i>Ecosystem threat status:</i>	43% of estuarine ecosystems are threatened
<i>Ecosystem protection level:</i>	33% are well-protected (though not all of these are in a good ecological condition), 59% are not protected at all
<i>Key ecosystem services:</i>	Nurseries for fish, various raw materials for food and livelihoods, recreation
<i>Main pressures:</i>	Decrease or other disruptions to freshwater flows, inappropriate land use and development (immediate and upstream), unsustainable fishing/bait collection, pollution, invasive alien species
Marine and coastal ecosystems	
<i>Ecosystem threat status:</i>	58% of coastal and inshore ecosystems and 41% of offshore ecosystems are threatened
<i>Ecosystem protection level:</i>	Coastal and inshore: 9% well-protected, 16% not protected; offshore: 4% well-protected, 69% not protected
<i>Key ecosystem services:</i>	Fish and other marine resources, recreation, trade and transport, ecotourism, coastal protection
<i>Main pressures:</i>	Coastal development, fishing, shipping, invasive species, pollution, deep sea mining, decrease in freshwater reaching the coast and sea
Species of Special Concern	
Red List assessments reveal that a significant proportion of South Africa's 95 000 species are threatened, as follows: Plants 12%, inland mammals 20%, birds 14.5%, amphibians 14%, reptiles 9%, freshwater fish 21% and butterflies 7%. Loss of natural habitat, invasive alien species and over-harvesting are the main pressures placing the survival of species at risk.	

Protected areas (information extracted from NPAES 2016)

7.9% of South Africa's terrestrial surface currently falls within protected areas. Of the 969 recognised terrestrial ecosystem types, 21% are well protected, 13% are moderately protected, 30% are poorly protected and 37% are not protected. 23% of the coastline and 0.4% of offshore marine habitat is protected.

Key pressures on South Africa's biodiversity

The most recent national assessment of South Africa's biodiversity and ecosystems (NBA 2011) has shown that, despite an impressive baseline of innovative policies, numerous conservation programmes, extensive efforts, and significant advances made in the biodiversity sector over the last decade in particular, South Africa's biodiversity remains under high pressure from a variety of human-induced factors and disturbances.

The major pressures on South Africa's biodiversity include:

- loss and degradation of natural habitat in terrestrial, freshwater, estuarine and marine ecosystems due to unsustainable land-use practices, inappropriate or poorly-located land uses
- invasive alien species (both plant and animal)
- destructive and over-harvesting of species, especially in the marine environment
- illegal wildlife trafficking and other illegal resource use
- over-abstraction of water and pollution of aquatic ecosystems
- disruption of natural drivers of ecosystem functioning (such as fire cycles)
- impact induced by climate change.

The social and economic costs of not managing ecosystems in a sustainable manner are high, as evidenced by accelerated land degradation and biodiversity loss, lowered land productivity, weakened ecosystem (and social) resilience, declining availability and quality of freshwater, increased infestation by invasive alien species, collapsing fish stocks, and increased air and water pollution. These impacts are all worsened by an increasingly unpredictable climate and an increase in the frequency and severity of extreme weather events, which cause severe social and economic disruption, increased food insecurity due to crop and stock losses and lower yields, damage to infrastructure, and even loss of life.

These impacts compromise the nation's ability to fulfil its social and economic growth goals, and impacts on the quality of life of all South Africans especially the rural poor who rely daily on biodiversity resources to meet their subsistence needs. Responding to this requires a development path which minimises pressures on ecosystems and species, and strengthens resilience to climate change, whilst providing opportunities for addressing poverty, securing essential ecosystem services and addressing other social improvement needs (Cadman *et al.*, 2010).

Coordinated implementation of the strategies identified in this NBF will contribute meaningfully to achieving these goals.

2.2. Institutional context for biodiversity management and protection

South Africa has adopted a landscape approach to conserving biodiversity, which involves good alignment and co-operation between diverse role-players and effective mainstreaming of biodiversity

considerations into planning, decision-making and daily practice in multiple sectors. The NBF sets out a framework for achieving this co-ordination at national level.

The Department of Environmental Affairs (DEA) as the custodian for environmental management is mandated by Section 24 of the Constitution, and Chapter 2 [(b)[i,ii and iii] of the Bill of Rights, to have the environment protected, for the benefit of present and future generations, through reasonable legislative and other measures that: prevent pollution and ecological degradation; promote conservation; and, secure ecologically sustainable development and use of natural resources, while promoting justifiable economic and social development.

However, responsibility for managing, conserving and ensuring sustainable use of South Africa's biodiversity assets is shared by a large number of entities in government, and, increasingly, civil society and the private sector. These organisations include those whose core business is biodiversity management and protection, and a growing number of entities whose core business is some kind of productive activity that either relies or impacts on natural resources and biodiversity. (See **Table 1** for a summary). Many decisions affecting biodiversity are taken outside of the biodiversity or environmental sector (for example, such as agriculture, mining, energy and urban development), which makes it all the more important to adopt a framework for integrated, policy-aligned decision-making.

A full description of the institutional context for biodiversity management, protection and sustainable use in South Africa is provided in the NBSAP 2015, pages 10 – 15.

2.3. Alignment with national policy and legislation

The NBF forms part of the robust policy and legislative framework that guides and governs the conservation, management and sustainable use of South Africa's biodiversity assets. For this reason, the NBSAP, the implementation of which the NBF sets out to support, has been designed to align with key national legislation and policy in the broader environmental sector.

The overall framework for environmental governance is provided by the South African Constitution (Act 108 of 1996) and its associated Bill of Rights. Although the Constitution does not specifically refer to 'biodiversity', it enshrines certain environmental rights and specifies the powers and functions of national and provincial governments in terms of 'the environment,' 'nature conservation,' and 'natural resources,' such as soil, water, forests and marine resources.

Three pieces of environmental legislation collectively set out the **principles and procedures governing the protection and management of biodiversity**, and provide the **legislative framework for implementation of the NBSAP**:

- The **National Environmental Management Act** (NEMA, Act 107 of 1998) – which is the key legislation for environmental management in South Africa, and provides an overall framework for general law reform in the environmental management field, and is of particular relevance to SO 3 of the NBSAP.
- The **Protected Areas Act** – which governs the establishment and management of protected areas, and is of particular relevance to NBSAP SO 1.

- The **Biodiversity Act** – which provides tools and mechanisms for conserving and managing biodiversity outside of protected areas, and is of cross-cutting relevance to all strategic objectives and outcomes of the NBSAP.

In addition, there are several other Acts relating to water, forests, marine resources and coastal management that are of relevance, especially to Strategic Objectives 1, 2 and 3 of the NBSAP. These are summarised here in Box 1, below.

Box 1: Key legislation of relevance to biodiversity conservation, management and sustainable use

Over-arching legislation and principles:

The Constitution of South Africa (Act 108 of 1996)

White Paper on the Conservation and Sustainable Use of South Africa's Biological Diversity (1997)

White Paper on Environmental Management Policy for South Africa (1998)

Core environmental legislation:

National Environmental Management Act (Act 107 of 1998), as amended

National Environmental Management: Biodiversity Act (Act 10 of 2004)

National Environmental Management: Protected Areas Act (act 57 of 2003)

Related natural resource management legislation:

Marine Living Resources Act (Act 18 of 1998)

The Conservation of Agricultural Resources Act (Act 43 of 1983)

National Forest Act (Act 84 of 1998)

Integrated Coastal Management Act (Act 24 of 2008), as amended

Relevant spatial planning legislation:

Sub-division of Agricultural Land Act (Act 70 of 1970)

The Draft Preservation and Development of Agricultural Land Framework Bill and Policy

The Spatial Planning and Land-Use Management Act (Act 16 of 2013)

To fulfil its vision of conserving, managing and using biodiversity sustainably to ensure equitable benefits to all the people of South Africa, the NBSAP has also been designed to ensure alignment with national policies and frameworks that guide the broader sustainable development agenda in the country. Key among these are:

- the National Development Plan (NDP) 2030 (in particular Chapter 5)
- the Medium-Term Strategic Framework (MTSF) outcomes of the Presidential Delivery Agreement (particularly Outcome 10), which is updated at regular intervals
- the National Strategy for Sustainable Development (NSSD), 2002.

The vision of the NDP is that South Africa's transition to an environmentally sustainable, climate-change resilient, low-carbon economy and just society will be well-progressed by 2030 (MTSF, 2014 – 2019). The NDP proposes a multi-dimensional framework, including ten critical actions, to address the principal challenges of poverty and inequality. As part of this process, it specifically identifies the need to use water and other natural resources more sustainably, emit less carbon, and protect oceans, soils and wildlife, in ways that buoy up the economy and create employment opportunities. This aligns closely with the vision and strategic objectives of the NBSAP.

The Medium-Term Strategic Framework (MTSF 2014 – 2019) developed by the Presidency translates the NDP vision and priorities into a set of sector-specific outcomes, outputs and targets. Those

relevant to the environmental sector are reflected under Outputs 1 to 4 of Outcome 10, which is to protect and enhance environmental assets. The MTSF places emphasis on:

- **increasing the coverage of protected areas** and bringing more species and ecosystems under protection (MTSF Outcome 10, Output 4, which aligns with NBSAP SO 1)
- **enhancing the quality and quantity of water resources** by, among other things, protecting groundwater reserves and wetlands, preventing loss of wetlands, and increasing the number of wetland and river ecosystems that are restored to health (MTSF Outcome 10, Output 1, which aligns with NBSAP SO 2)
- **addressing the degradation and depletion of natural resources and ecological infrastructure** through strengthened environmental management, improved environmental governance and decision-making, and the incorporation of biodiversity priorities into national, provincial and local plans (MTSF Outcome 10, Output 3, which aligns with NBSAP SOs 2 and 3)
- **reducing climate change impacts** through reducing CO₂ emissions and developing climate change adaptation plans (MTSF Outcome 10, Output 2, which aligns with NBSAP Outcome 2)
- **harnessing research and information management capacity** and developing and maintaining datasets to generate policy-relevant data, indicators and indices (which aligns with NBSAP SO6).

This close alignment means that the framework and acceleration measures outlined in this document contribute directly to achieving the targets under Outcome 10 of the MTSF, and the objectives of the National Development Plan.

2.4. Alignment with international commitments

The priorities identified in the NBF are aligned with international conventions, treaties, protocols and other agreements relating to biodiversity management and protection to which South Africa is a signatory.

Key among these is:

- The UN Convention on Biological Diversity (CBD, ratified by South Africa in 1995), and its key protocols:
 - The Cartagena Protocol on Biosafety (governing the movement of living modified organisms, resulting from biotechnological intervention, from one country to another)
 - The Nagoya Protocol on access to genetic resources and the fair and equitable sharing of benefits arising from their use
- The UN Convention to Combat Desertification (UNCCD, ratified by South Africa in 1997)
- The UN Framework Convention on Climate Change (UNFCCC, ratified by South Africa in 1997)
- Other biodiversity-related conventions (date of ratification in brackets), including:
 - The International Plant Protection Convention (1952)
 - The RamSar Convention on Wetlands (1971)
 - The World Heritage Convention (1972)
 - CITES - The UN Convention on Trade in Endangered Species of Wild Flora and Fauna (1975)
 - The International Treaty on Plant Genetic Resources for Food and Agriculture (2004)
- Other international agreements and programmes:

- The UN Agenda 2030 for Sustainable Development and the Sustainable Development Goals (SDGs) – See [Annexure 6.3](#)
- The CBD Strategic Plan for Biodiversity 2011 – 2020, and the Aichi Biodiversity Targets (ABTs) – see [Annexure 6.4](#)
- The UNESCO Man and Biosphere (MAB) Programme
- The Intergovernmental Platform on Biodiversity and Ecosystem Services (IPBES).

Alignment of the NBF with these international commitments is indicated in **Table 4** in [Section 3](#) of this document.

2.5. Principles of the NBF

This National Biodiversity Framework is firmly seated on a number of core principles that are aligned with those articulated in the NBSAP, and that should guide the work of all role-players in the biodiversity sector. These include, though are not limited to:

- *'Duty of Care' and the 'precautionary principle'*, and other principles laid out in the National Environmental Management Act (NEMA, Act 107 of 1998), in particular the provisions under Principle 4, which provides guidance on Sustainable Development, Environmental Management, Environmental Justice and Access and Benefit-sharing.
- *A landscape approach to biodiversity conservation and management*, which involves working both within and beyond the boundaries of protected areas to manage a mosaic of land uses including protection, restoration, production and subsistence use, in order to deliver ecological, economic and social benefits that are equitably shared by all citizens of South Africa.
- *A consistent and strategic approach guided by the principles of representation and persistence*, in which a representative sample of ecosystems and species is conserved along with the ecological processes that allow these biodiversity patterns to persist over time. This is achieved through identification of strategic spatial priorities, based on best available science, in national, provincial and municipal systematic biodiversity plans that guide the spatial focus of the sector's work. These spatial priorities take the form of, amongst others, Critical Biodiversity Areas (CBAs), Ecological Support Areas (ESAs), Strategic Water Source Areas, Freshwater Ecosystem Priority Areas (FEPAs), and priorities for protected area expansion.
- *Biodiversity has intrinsic value and but also constitutes critical natural capital which is essential for sustainable and resilient economic and social development*. Management of biodiversity and ecological infrastructure should be directed to meet conservation objectives, and should also be people-centred and strive to meet multiple transformational benefits, by placing strategic protection, wise management, and sustainable use of natural capital at the core of the country's sustainable development agenda.
- *Partnerships that enable cooperation and collaboration across institutional and administrative boundaries* are essential for managing ecosystems effectively at the landscape scale.

Section 3: Integrated framework for coordinating work in the biodiversity sector

South Africa's NBSAP is the overarching or 'umbrella' strategy guiding the work of the biodiversity sector. It is complemented by a wide range of other **national strategies, frameworks and systems** that have been developed to guide work in particular parts of the sector (for example, management of biological invasions, biodiversity information management, or ecosystem-based adaptation) and that provide effective vehicles for implementing the NBSAP. Some of these strategies and frameworks are more conceptual in nature (providing principles, high-level strategic objectives or general approaches), whilst others also provide detailed sets of activities, with indicators, timelines and institutional responsibilities clearly spelt out. Because there is such a proliferation of strategies in the sector, this Framework provides an overview of those that align most closely with the NBSAP, indicating what the purpose of each strategy is, how it is aligned with the strategic objectives, outcomes and priority activities of the NBSAP, how they cross-link with each other, and how they align with international commitments under multilateral agreements to which South Africa is a signatory, and programmes in which South Africa participates. This information is presented in **Table 4**.

Table 5 presents a set of **key interventions**, called '**accelerators**', which can make a significant contribution to accelerating implementation of the NBSAP and its related strategies, either by addressing bottlenecks or barriers, or by providing opportunities to fast-track implementation. These are presented as *recommendations* and should be used to guide priority-setting by institutions and organise collective action within the biodiversity sector.

3.1. National strategies, frameworks and systems in the biodiversity sector

Table 4 presents an overview of 30 strategies, frameworks and systems that exist in the biodiversity sector (see [Annexure 2](#) for a full document references). Only those strategies that are of relevance at the national scale to the biodiversity sector at large, and that are readily available in the public space, have been included. Provincial, local or institution-specific strategies, whilst important, have generally been excluded from the overview, though cross-linkage to them is indicated where this is known and relevant.

TABLE 4: Overview of strategies, frameworks and systems guiding work in the biodiversity sector

SO = Strategic Objective; ABTs = Aichi Biodiversity Targets; SDGs = Sustainable Development Goals; all other acronyms described in [Section 6](#)

1. The National Protected Areas Expansion Strategy (NPAES)	Date	Lead developer	Partners (bold = lead)	Timeframe	Likely revision
<p>Description:</p> <p>The NPAES (first edition 2008, revised 2016) is a 20-year strategy (updated every 5 years) to guide cost-effective expansion of protected areas in South Africa to increase ecosystem representivity, promote ecological sustainability, strengthen resilience to climate change, and support diversification of rural livelihoods and local economic development.</p> <p>It sets national-level protected area expansion targets (for ecosystems), provides maps of priority areas for expansion, identifies gaps, and recommends mechanisms for achieving the targets. Detailed spatial planning and roll-out to achieve the targets is carried out at provincial level, through provincial protected area expansion strategies and biodiversity plans.</p> <p>The NPAES enables coordination between the many role-players involved in protected area expansion by providing a common set of targets and spatial priorities.</p>	2016	DEA	DEA, SANParks, provincial conservation authorities, land owners, CPAs, NGOs	2016 - 2025	Targets to be updated every 5 years
			<p>Relevance to NBSAP</p> <p>NBSAP SO 1</p> <p>Outcome 1.1 (activities 1.1.1 and 1.1.2)</p>	<p>Cross linkage to other strategies/frameworks</p> <ul style="list-style-type: none"> • The Phakisa MPSG Strategy • Provincial Protected Area Expansion Strategies • SANParks Protected Area Expansion and Land Consolidation Strategy • National Buffer Zone Strategy for National Parks • The Business Case for Biodiversity Stewardship • The National Plant Conservation Strategy, • The National Biosphere Reserves Strategy 	<p>International alignment</p> <p>ABT: 11</p> <p>SDGs: 14 and 15</p>

2. The Business Case for Biodiversity Stewardship	Date	Lead developer	Partners	Timeframe	Likely revision
<p>Description: The Business Case is a Report that presents the economic rationale for increasing investment in biodiversity stewardship in South Africa. It outlines the role of biodiversity stewardship as a key tool for contributing to cost-effective expansion of protected areas, and placing priority biodiversity areas under improved, long-term management with benefits for landowners, diversification of rural livelihoods, and enhanced local economic development.</p> <p>The Business Case makes six key recommendations relating to: resourcing of provincial biodiversity programmes; incentives; partnerships for implementation (with a focus on NGOS), promoting the land reform agenda, technical support and strengthening the community of practice for implementation of biodiversity stewardship.</p>	2015	SANBI/DEA	DEA, SANBI, SANParks, Provincial conservation authorities, NGOs and landowners	2015 - 2020	Not specified
			<p>Relevance to NBSAP</p> <p>NBSAP SO 1</p> <p>Outcome 1.1 (activities 1.1.1, 1.1.2 and 1.1.3.)</p> <p>Outcomes 1.3 and 1.4 (cross-cutting)</p>	<p>Cross-linkages</p> <ul style="list-style-type: none"> NPAES (and provincial counterparts) National Buffer Zone Strategy for National Parks National Biodiversity Economy Strategy (incorporating the Wildlife Economy Strategy) National MAB Strategy People and Parks Co-management Framework BIOFIN Plan 	<p>International alignment</p> <p>ABT: 11</p> <p>SDGs: 1, 8, 14, 15</p>
3. National Buffer Zone Strategy for National Parks (Government Notice 106 of 2012)	date	Lead Developer	Partners	Time period	Likely revision
<p>Description:</p>	2012	DEA	DEA, SANParks, Provincial conservation authorities, biosphere reserves, landowners, communities	Open-ended	Not specified
				<p>Cross-linkages</p>	<p>International alignment</p>

<p>This document sets out the South African government's national strategy on the establishment and management of buffer zones around national parks. The purpose of the strategy is to: inform the public of the government's objectives in respect of buffer zones, and how it intends to meet these; and, to guide government agencies and organs of state in developing plans to achieve these objectives. The vision for buffer zones is to provide for integration of national parks into local landscapes for the benefit of those living adjacent to the protected areas. In support of this vision, the strategy describes 8 goals, with recommendations for how they should be achieved. The goals relate to: the kinds of areas that should be included in buffer zones, and mechanisms for their inclusion; suitable and unsuitable land uses in buffer zones, and ways of incentivizing and optimizing sustainable land-use practices; the development of community-based management initiatives and other partnerships that increase the flow of benefits to communities.</p>			<p>NBSAP SO 1</p> <p>Outcome 1.1 (activities 1.1.1, 1.1.2 and 1.1.3)</p> <p>Outcome 1.3 (activities 1.3.2 and 1.3.5)</p> <p>Outcome 1.4 (activities 1.4.2 and 1.4.3)</p>	<ul style="list-style-type: none"> • NPAES (and provincial counterparts) • National MAB Strategy • National Biodiversity Economy Strategy • People and Parks Framework for Co-Management 	<p>ABTs: 11, 14, 16</p> <p>SDGs: 1, 2, 8, 15</p>

5. The Operation Phakisa Marine Protection Services and Governance Strategy (MPSG)	2014	GoSA – the Presidency, with SANBI	The Presidency, SANBI, Oceans Secretariat, DEA, DAFF, DST	2014 - 2019	Not specified
<p>Description: The MPSG informs the implementation an overarching, integrated governance framework for sustainable growth of the ocean economy that will maximise socio-economic benefits, whilst ensuring adequate ocean protection over the next five years.</p> <p>It identifies 10 key initiatives to achieve this objective. Key amongst these are the establishment of 22 offshore marine protected areas, the development of marine spatial planning tools to enable a sustainable ocean economy; implementation plans and enforcement measures for regional and sub-regional marine spatial plans; a fine-scale marine management plan to enable a sustainable economy; and, a review of ocean-related legislation (Integrated Coastal and Ocean Management Act and the Oceans Act).</p>			<p>Relevance to NBSAP</p> <p>NBSAP SO 1, Outcome 1.1 (activity 1.1.1)</p> <p>Outcome 1.3 (activity 1.3.3)</p>	<p>Cross-linkages</p> <ul style="list-style-type: none"> NPAES (and counterparts in coastal provinces) Operation Phakisa and Presidential 9-point Plan 	<p>International alignment</p> <p>ABTs: 6, 11</p> <p>SDG: 14</p>
6. South Africa's Strategy for Plant Conservation	<p>Date</p> <p>2015</p>	<p>Lead developer</p> <p>SANBI and BotSoc of Southern Africa</p>	<p>Partners</p> <p>SANBI, BotSoc, other NGOs, SANParks, provincial conservation authorities, academic institutions, citizen scientists</p>	<p>Timeframe</p> <p>2015 - 2020</p>	<p>Likely revision</p> <p>tbc</p>
<p>Description: South Africa's Strategy for Plant Conservation is structured around 16 outcome-oriented targets, clustered under 5 objectives relating to: understanding and documenting South Africa's plant diversity (targets 1 to 3); conservation (targets 4 to 10); sustainable and equitable use (targets 11 to 13); education and awareness (target 14); and, capacity development and public engagement (targets 15 and 16).</p>			<p>Relevance to NBSAP</p> <p>SO 1</p> <p>Outcome 1.1 (activity 1.1.1)</p> <p>Outcome 1.2 (activities 1.2.2 and 1.2.4)</p>	<p>Cross linkages</p> <ul style="list-style-type: none"> NPAES (and provincial counterparts) 	<p>International alignment</p> <p>Global Strategy for Plant Conservation (GSPC)</p> <p>CITES</p> <p>ABT: 12, 13</p>

The Strategy specifies key outputs under each target, and provides a detailed analysis of the cross-linkages between these and the NBSAP Outcomes and Activities.			Also has relevance under SO 3; SO 4; SO 5 and SO 6 (see table 1 in the Strategy for details)		SDGs: 15
7. The National Man and Biosphere Reserve Strategy and Implementation Plan (MAB Strategy)	Date	Lead developer	Partners	Timeframe	Likely revision
	2016	DEA	DEA, NGOs appointed as management authorities of the biosphere reserves, SANParks, Provincial conservation authorities, NGOs, private sector partners, communities	2016 - 2020	To be determined
Description: This is South Africa's first national strategy for the Biosphere Reserve Programme. It builds on lessons learnt over 20 years, complemented by a comprehensive situation analysis and extensive consultation process. Its main purpose is to enable biosphere reserves to reach their full potential as model landscapes for implementing integrated approaches to environmental protection and sustainable socio-economic development . The Strategy defines the overall strategic direction for the Biosphere Reserve Programme, under three strategic objectives relating to conservation of biodiversity, ecosystems and cultural heritage; building sustainable communities ; and, promoting awareness and adaptive capacity . It identifies cross-cutting issues and interventions through which the objectives can be achieved, and describes their expected outputs. It also describes enabling conditions for successful implementation of the Strategy, including financing, communication and capacity-building needs, and includes a framework for nomination of new Biosphere Reserves. The Strategy is supported by a comprehensive <i>Implementation Plan, and Monitoring and Evaluation Framework</i> , which sets priorities , specifies practical activities and institutional responsibilities for implementation, indicators and timelines for implementation.			Relevance to NBSAP SO 1 Outcome 1.1 (all activities, but especially 1.1.2 and 1.1.3) Outcome 1.3 (activity 1.3.5) Outcome 1.4 (activity 1.4.3)	Cross-linkages <ul style="list-style-type: none"> NPAES (and provincial counterparts) National Buffer Zone Strategy Business case for Biodiversity Stewardship People and Parks Co-Management Framework National Biodiversity Economy Strategy BIOFIN Plan 	International alignment UNESCO World Heritage Convention and Biosphere Reserve Strategy The AU Convention on Conservation of Nature and Natural Resources (2012) ABTs: 8, 19, 20 SDGs: 1, 3, 8, 14 and 15

8. The National Biodiversity Economy Strategy (NBES)			Partners	Timeframe	Likely revision
Date	Lead developer				
2017	DEA		DEA, Multiple partners in government, the private sector and civil society	2015 - 2030	Not specified
Description: The NBES is a 14-year framework the purpose of which is to provide structural coordination and direction to guide the sustainable growth and transformation of the wildlife and bioprospecting industries . It provides for the creation of inclusive biodiversity-based economic activities that can accelerate development of the rural economy , improve social well-being and ensure equitable access to and sharing of benefits from biological resources , while maintaining the ecological resource base . The NBES has set an overall industry growth goal of 10% per annum to be achieved through implementation of 20 enabling activities (10 each for the wildlife and bioprospecting industries), that will: facilitate the formation of cooperative partnerships between government, the private sector and communities to open up opportunities in various market segments; address development and growth constraints; enable skills transfer; and, manage the wildlife and bioprospecting sectors sustainably. Working through a nodal approach , the NBES identifies priority activities , outlines stakeholder roles , and sets out a detailed, results-based monitoring framework .			Relevance to NBSAP NBSAP SO1 Outcome 1.3 (activities 1.3.1, 1.3.2, and 1.3.5)	Cross linkages <ul style="list-style-type: none"> • Strategy for investing in Ecological Infrastructure • Framework for investment in Environment and Natural Resource Management for a Green Economy • The BIOFIN Plan • The National Plant Conservation Strategy • National MAB Strategy • People and Parks Co-Management Framework 	International alignment Nagoya Protocol of the CBD AU Guidelines for Co-ordinated implementation of the Nagoya Protocol ABTs: 4, 6, 13,16 SDGs: 1, 2, 5, 8, 10, 11, 12

<p>The purpose of this framework is to guide action and support collaboration for investing in ecological infrastructure (EI).</p> <p>Seven principles make up the core of the Framework. These include that investment in EI should take place in ways that: build on existing programmes and experiences; optimise job creation and rural development; promote socially-sensitive participation; achieve clearly-defined outcomes and benefits; focus on systematically identified, strategic spatial priority areas; and, involve transdisciplinary collaboration.</p> <p>In addition, the framework provides a brief background to what is meant by ecological infrastructure and investment in ecological infrastructure and how this contributes to national development goals; it identifies key role players and describes some key programmes and practices into which investment in EI can be integrated; it outlines the scope for resource mobilisation for investing in ecological infrastructure, identifies research needs going forward, and briefly outlines next steps for advancing progress in this field.</p> <p>This Framework is not static, and will be added to and expanded as experience in this field is gained.</p>			<p>Relevance to NBSAP</p> <p>NBSAP SO 2, Outcome 2.1 (all activities)</p> <p>Outcome 2.2 (activity 2.2.1)</p> <p>NBSAP SO 3 Outcome 3.2 (activities 3.2.1, 3.2.2, 3.2.4, 3.2.6, 3.2.7)</p> <p>Outcome 3.5 (activities 3.5.2, 3.5.3, 3.5.5)</p> <p>NBSAP SO 1 Outcome 1.1 (activity 1.1.3)</p> <p>Outcome 1.3 (activity 1.3.5)</p> <p>Outcome 1.4 (activity 1.4.3)</p>	<p>Other cross-linkages</p> <ul style="list-style-type: none"> • EbA Strategy • Biodiversity Sector Climate Change response Strategy • NPAES (and provincial counterparts) • Business Case for Biodiversity Stewardship • NBES • BIOFIN Plan • The national REDD+ programme led by DEA/DAFF 	<p>International commitments</p> <p>UNCCD</p> <p>UNFCCC</p> <p>ABTs: 5, 9, 14, 15</p> <p>SDGs: 1, 8, 13, 15</p>
<p>12. A Framework for investment in Environmental and Natural Resource Management (ENRM) for a Green Economy</p>	Date	Lead developer(s)	Partners	Timeframe	Likely revision
	2016	DST, DEA, DBSA (developed by CSIR)	DST, DEA, DBSA, Relevant role-players in the private sector, DAFF, DWS, the "Working For" programmes, donors, NGOs	Not limited	Not Specified

<p>This Framework has been designed to guide catalytic investment in Environmental and Natural Resource Management (ENRM), particularly as it relates to the green economy. The specific aim is to support ENRM initiatives that protect and enhance biodiversity and the resilience of the country's ecosystems, in ways that promote – and capitalise on - the job creation potential of the natural resource management sector.</p> <p>The Framework is based on research and a consultation process. It provides a comprehensive analysis of the current context for enabling investment in ENRM, lists examples of key initiatives, and identifies key challenges and opportunities. The Framework identifies four key themes, under which short, medium and long-term investment options are specified.</p> <p>The four themes are to: enhance government coordination of South Africa's transition to a green economy; enable greater private sector investment in ENRM; support catchment-based studies to integrate principles of a green economy into restoration and conservation of ecological infrastructure; and, enhance technical and financial support for small business development in the biodiversity economy</p>	Relevance to NBSAP		Cross-linkages	International alignment	
	<p>NBSAP SO 2 Outcome 2.1 (activities 2.1.3, 2.1.5)</p> <p>NBSAP SO 1 Outcome 1.3 (activity 1.3.1, 1.3.5) Outcome 1.2 (activity 1.2.3)</p>		<ul style="list-style-type: none"> • Strategy for investing in Ecological Infrastructure • EbA Strategy • NBES • BIOFIN Plan 	<p>ABTs: 5, 9, 14, 15</p> <p>SDGs: 8, 13, 15</p>

strengthened management capacity and collaborative governance amongst the different spheres of government responsible for management of invasive species, the need to increase understanding through research and monitoring , raise awareness of the problem, and equitably distribute the costs of management. It addresses all aspects, including the introduction, establishment and spread of invasive species in terrestrial, freshwater and marine ecosystems, and describes approaches that can be targeted at species, areas of invasion and pathways of movement. Its overall goal is to protect the natural capital of the country, in the interests of achieving and sustaining the goals of the National Development Plan.				<ul style="list-style-type: none"> • Framework for Investing in Ecological Infrastructure • Framework for investment in ENRM for a Green Economy 	
14. The Biodiversity Sector Climate Change Response Strategy	Date	Lead developer	Partners	Timeframe	Likely revision
	2014	DEA	DEA and stakeholders sector-wide	Open-ended	Not specified
<p>Description: This Strategy, which is aligned with the National Climate Change response Policy/Framework (2011), outlines principles and key elements of the biodiversity sector's strategic response to the risks posed by climate change. It serves as an over-arching national strategy to guide policy development and to inform the development of more specific implementation plans by sector departments.</p> <p>The Strategy identifies three strategic directions, under each of which clusters of relevant activities are listed (without specification of indicators, timeframes or institutional roles). The directions and key kinds of activities are as follows: Monitoring and Evaluation (with emphasis placed on strengthening relevant research, including impact-monitoring) Ecosystem-based Adaptation (with emphasis placed on maintaining key ecological infrastructure in good ecological condition, restoring degraded EI, improved land-use planning (incorporating CC criteria), improved vulnerability assessment and climate-proofing communities)</p>			Relevance to NBSAP	Cross-linkages	International alignment
			<p>Cross-cutting relevance to NBSAP SOs 1, 2, 3 and 6</p> <p>SO 1, Outcomes 1.1 and 1.2</p> <p>SO 2, Outcomes 2.1 and 2.2</p> <p>SO 3, Outcome 3.1, 3.2 and 3.6</p> <p>SO 6, Outcome 6.1 and 6.4</p>	<ul style="list-style-type: none"> • The Eba Strategy • The strategy for investing in ecological infrastructure • Framework for investment in ENRM for a Green Economy • The NPAES • The Climate Change Adaptation Plans for Biomes in South Africa • BIOFIN Plan 	<p>UNFCCC</p> <p>UNCCD</p> <p>Paris Agreement</p> <p>UN Sendai Framework for Disaster Risk Reduction</p> <p>Nairobi Work Programme</p>

<p>Protection of natural capital (with emphasis on measures to keep CBAs, ESAs and FEPAs intact – or to restore degraded ones, and increasing the extent of the protected area estate). The strategy identifies intersectoral coordination through the development of regional and local partnerships as a key mechanism for ensuring delivery of the recommended actions.</p>					
<p>15. Climate Change Adaptation Plans for South African Biomes</p>	<p>Date</p>	<p>Lead developer</p>	<p>Implementing partners</p>	<p>Timeframe</p>	<p>Likely revision</p>
	<p>2015</p>	<p>DEA</p>	<p>DEA and stakeholders sector-wide</p>	<p>Not limited</p>	<p>No specified</p>
<p>This document summarizes the current state of knowledge about climate change threats, drivers and vulnerabilities, relevant to each of the nine biomes in South Africa and identifies appropriate, biome-specific adaptive actions.</p> <p>The adaptive actions are grouped into four categories: (i) spatial planning approaches, which indicate where different land-uses should best be located; (ii) management approaches, which influence how the land uses are executed; (iii) ecosystem-based approaches, which reduce the stressors that compromise the capacity of ecosystems to buffer social and biological systems from the effects of climate change; and, (iv) biodiversity stewardship approaches, through which adaptive capacity outside of protected areas can be enhanced by more sustainable land management.</p>			<p>Relevance to NBSAP</p> <p>NBSAP SO 2, Outcomes 2.1 and 2.2 (cross-cutting)</p> <p>NBSAP SO 1 Outcomes 1.1, 1.3 and 1.4 (cross-cutting)</p>	<p>Cross-linkages</p> <ul style="list-style-type: none"> • EbA Strategy • Framework for investing in ecological infrastructure • Framework for investment in ENRM for a Green Economy • NPAES (and provincial counterparts) • NBES 	<p>International alignment</p> <p>UNCCD</p> <p>UNFCCC</p> <p>ABTs: 14, 15</p> <p>SDGs: 13, 15</p>

	<p>2013</p>	<p>DWS</p>	<p>DWS, DEA, DAFF, SANBI, SANParks, Working for Wetlands, Working for Water, WRC, provincial environmental departments,</p>	<p>Five to ten years</p>	<p>Not specified</p>

National Biodiversity Framework

January 2018

			local governments, Catchment Management Agencies		
<p>The NWRS2 builds on the first NWRS which was published in 2004. The purpose of the NWRS2 is to ensure that national water resources are protected, conserved, used, developed, managed and controlled in an efficient, equitable and sustainable manner, to meet South Africa's development goals over the next five to 10 years. It identifies three objectives, six key principles and seven strategic themes, one of which focuses on environmental protection and conservation of water resources (which is covered in Chapter 5). Of particular relevance to the biodiversity sector are strategic actions identified in Chapter 5 on Water Resource Protection, including those to: invest in Strategic Water Source Areas (SWSAs); maintain and rehabilitate water ecosystems; maintain Fresh Water Ecosystem Priority Areas (FEPAS) in a good ecological state; protect riparian and wetland buffers and groundwater recharge areas; rehabilitate strategic water ecosystems to maintain water quality and quantity; and monitor ecological health to inform management.</p>			<p>Relevance to NBSAP</p>	<p>Cross-linkages</p>	<p>International alignment</p>
			<p>NBSAP SO 2 Outcome 2.1 (activity 2.1.1)</p>	<ul style="list-style-type: none"> NPAES (and provincial counterparts) Framework for Investing in Ecological Infrastructure Framework for investment in ENRM for a Green Economy Biodiversity Sector Climate Change Response Strategy Water RDI RoadMap 	<p>Ramsar Convention on Wetlands</p> <p>ABTs: 9, 11, 14, 15</p> <p>SDGs: 1, 6, 8,9, 13, 15</p>
<p>17. Water Research, Development and Investment (RDI) Roadmap</p>	<p>Date</p>	<p>Lead Developer(s)</p>	<p>Partners</p>	<p>Timeframe</p>	<p>Likely Revision</p>

effective vehicle for increasing investments in water-related ecological infrastructure.					
18. The Biodiversity Finance Plan (BIOFIN)	Date	Lead developer	Partners	Timeframe	Likely revision
	2017	DEA	DEA, SANBI, National Treasury, national and provincial conservation authorities and other protected area management agencies, government, private sector and civil society groups sector-wide	Not specified	Not specified
Description: The overall aim of the Biodiversity Finance Plan is to ensure adequate funding of conservation and management interventions to protect and maintain South Africa's unique and valuable biodiversity. Based on a rigorous selection process and a systematic approach, the Plan proposes a set of 15 possible finance solutions which are vehicles for attaining sustainable development and creating jobs through strengthened biodiversity conservation and management. The 15 solutions are clustered around three biodiversity outcomes, as follows: Protected areas: PA revenues; property rates reforms; revolving land trusts; biodiversity tax incentives; biodiversity offsets; and, making the case for public funding of Pas Ecosystem Restoration: government grants for ecological infrastructure; water tariffs; NRM value-added industries; global climate funding; carbon tax offsets; NRM land-user incentives Sustainable Use: Tourism Conservation Funds; biodiversity-related fines and penalties; wildlife-ranching. The BIOFIN plan also provides concise technical proposals on how to operationalize the financial solutions and consolidated estimates of expected results. 	Established 2012	DEA, CSIR	All sector role-players	Not time bound	N/A
Description: The Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES) is a global initiative of which South Africa is a founding and participating member. IPBES aims to strengthen capacity for the effective use of science in decision-making at all levels , and to address the needs of Multilateral Environmental Agreements (MEAs) that are related to biodiversity. Working through a system of expert groups, forums, task teams and technical support units , IPBES works to produce, review, assess and critically evaluate relevant information and knowledge on the contribution of biodiversity and ecosystem services to sustainability generated by government, academia, scientific organizations, NGOs and indigenous communities. The IPBES Work Programme includes 18 deliverables , organized under 4 objectives . DEA serves as the national focal point for IPBES in South Africa, and the CSIR, with support from DEA, hosts the IPBES Technical Support Unit for Africa. 3.2. Accelerators for implementing the NBSAP priorities

Given the ambitious nature and breadth of the objectives and priorities identified in the NBSAP and related strategies, and in light of the implementation constraints (financial, technical and human resources) facing government and other partners in the sector, setting priorities for action is essential. While progress across the full spectrum of strategic objectives and outcomes is necessary, not all can be pursued with the same emphasis, in parallel. Priority should be given to a set of measures which have the greatest potential to speed up progress across goals and targets, taking into account their integrated nature, the specific national context, and the imperative of achieving economic, social and environmental harmony.

'**Accelerators**' are those measures that can most effectively remove bottlenecks and/or systemic or underlying barriers to implementation, or that provide the best opportunities for fast-tracking implementation, or achieving multiple goals simultaneously.

The set of acceleration measures recommended in **Table 5** was identified through a process which included: (i) detailed analysis of the NBSAP to extract the high priority activities; (ii) cross-referencing these with priorities identified in other strategies; and, (iii) a stakeholder consultation process involving 19 key institutions in the biodiversity sector, and other selected stakeholders identified on a targeted basis. During the consultation process, stakeholders were asked what they are already doing to implement priorities identified in the NBSAP (or other strategies), and what they envisage should or could be done to accelerate implementation in the next five years. These inputs were used to identify the measures that are included in Table 5, but, it is important to recognize that there may also be other suitable measures that were not identified during the consultation process, but that might serve as effective accelerators.

It is also important to note the acceleration measures identified here do not represent new activities that institutions must implement in addition to their already-heavy workloads; rather, they represent a collation of priorities that have already been identified, but in numerous, separate documents and plans, or through consultation with stakeholders. **Table 5** brings these together in one place, in a way that enables alignment between the NBSAP and other strategic priorities to maximise impact.

Table 5: Recommended acceleration measures, organized by NBSAP Strategic Objectives, Outcomes and high priority activities

NBSAP SO 1: Management and conservation of biodiversity assets and their contribution to the economy, rural development, job creation and social well-being is enhanced	
Relevant national strategies/frameworks/systems: The National Protected Areas Expansion Strategy, 2016; The Operation Phakisa Marine Protection and Governance Strategy, 2014; The Man and the Biosphere Reserve Strategy and Implementation Plan, 2016; The National Buffer Zone Strategy for National Parks, 2012; The People and Parks Co-Management Framework, 2010; The National Botanical Gardens Expansion Strategy, 2016; The National Plant Conservation Strategy, 2015; The Business Case for Biodiversity Stewardship, 2015; The National Biodiversity Economy Strategy, 2017 (incorporating the Wildlife Economy Strategy)	
NBSAP Outcome 1.1: The network of protected areas and conservation areas includes a representative sample ecosystems and species, and is coherent and effectively managed	
High priority NBSAP activities: 1.1.1. Expand the protected area estate across all ecosystems 1.1.2. Expand the network of conservation areas through mechanisms under the Biodiversity Act 1.1.3. Strengthen capacity for Biodiversity Stewardship Programmes	
Recommended acceleration measures	Implementation
1.1.1. Expand the protected area estate across all ecosystems <ul style="list-style-type: none"> • Ensure that the NPAES is gazetted • Achieve 5-year national targets in the NPAES for % representation of ecosystems included in protected areas, through: <ul style="list-style-type: none"> (i) Declaration of priority offshore marine protected areas in line with the Phakisa MPSG and NPAES, and coastal MPAs that have an offshore component (e.g. Addo and Namaqua MPAs) (ii) Expansion of national parks as per the SANParks expansion strategy and 3-year Land Inclusion Plan (focus on under-represented ecosystems: Nama Karoo, Grasslands and Succulent Karoo) (iii) Implementation of protected area expansion plans as per provincial conservation authority operational plans, including through identifying and declaring priority biodiversity stewardship sites (iv) Declaration (in terms of the National Forestry Act) of prioritized forests as forest nature reserves 	<ul style="list-style-type: none"> • DEA <ul style="list-style-type: none"> (i) DEA (MCM), Oceans Secretariat (ii) SANParks (iii) Provincial conservation authorities, CPAs, NGOs (iv) DAFF, provincial conservation agencies, private sector partners

<p>1.1.2. Expand the network of conservation areas through mechanisms under the Biodiversity Act</p> <ul style="list-style-type: none"> • Institutionalize, resource and implement the buffer zone function within SANParks • Develop and apply biodiversity management plans for priority ecosystems 	<ul style="list-style-type: none"> • DEA, SANParks • National and provincial conservation authorities, SANBI, scientists, landowners, CPAs
<p>1.1.3. Strengthen capacity for Biodiversity Stewardship Programmes</p> <ul style="list-style-type: none"> • Implement the recommendations of the Business Case for Biodiversity Stewardship, beginning with an assessment of the specific resource requirements of each provincial biodiversity stewardship programme • Implement the recommendations of the first National Biodiversity Stewardship Conference held in September 2017, as endorsed by MinTech and the Protected Area CEO's Forum • Convene a national biodiversity stewardship conference or forum annually • Update and implement the Biodiversity Stewardship Guidelines (2009) and develop and mainstream a Biodiversity Stewardship Implementation Framework and Policy • Explore innovative models for expanding areas brought under protection, such as Locally Managed Marine Areas (LMMAs) 	<p>DEA, SANBI, SANParks, provincial conservation authorities, BDS TWG, DRDLR, NGOs, landowners and community representatives</p>
<p>NBSAP Outcome 1.2: Species of Special Concern are sustainably managed</p>	
<p>Relevant NBSAP high priority activities:</p>	
<p>1.2.2. Sufficient <i>ex situ</i> conservation of threatened and useful species</p>	
<p>1.2.4. Maintain an effective Scientific Authority</p>	
<p>Recommended acceleration measures</p>	
<p>1.2.2 Sufficient <i>ex situ</i> conservation of threatened and useful species</p> <ul style="list-style-type: none"> • Secure budget, formalize and maintain relevant institutional partnerships to support expansion of South Africa's botanical garden network, specifically to operationalize the Kwelela and Limpopo National Botanical Gardens • Expand <i>ex situ</i> collections to increase representation of threatened and other species of special concern 	<p>Implementation</p> <p>SANBI, EPWP, ECPTA, DEDEAT, LEDET, Treasury, NBGs, RBG Kew, botanical researchers and experts</p>
<p>1.2.4. Maintain an effective scientific authority</p> <ul style="list-style-type: none"> • Publish non-detriment findings for priority species • Develop listing proposals for species threatened by international trade but not-yet CITES-listed and , early warning systems to flag new species potentially threatened by trade implemented 	<ul style="list-style-type: none"> • Scientific Authority • Scientific Authority

<ul style="list-style-type: none"> • Develop, implement and sustainably fund Biodiversity Management Plans for CR and EN species that are being unsustainably harvested 	<ul style="list-style-type: none"> • SANBI, SANParks, provincial authorities, local governments
<p>Outcome 1.3: The biodiversity economy is expanded, strengthened and transformed to be more inclusive of the rural poor</p> <p>Relevant high priority NBSAP activities:</p> <p>1.3.1. Strengthen the contribution of the natural products sector to the national economy and the NBES</p> <p>1.3.2. Strengthen the contribution of the wildlife sector to the national economy and the NBES</p> <p>1.3.5. Pilot Biodiversity Economy transformation nodes to demonstrate multiple benefits</p>	
<p>Recommended acceleration measures</p>	
<p>1.3.1.</p> <ul style="list-style-type: none"> • Launch and operationalize BioPANZA, and develop a Bioprospecting Charter for the sector , including principles for environmental sustainability • Co-ordinate research and surveys of species used in bioprospecting and biotrade and develop management tools to ensure sustainable use • Explore options (for example through feasibility studies) for cultivation of trees and plants of medicinal use to secure resource supply and reduce pressure on wild populations, with community participation 	<p>Implementation</p> <ul style="list-style-type: none"> • DEA, dti, DST, DRDLR, DAFF, provincial conservation departments, sector stakeholders – private sector and communities) • DEA, DST, ARC, CSIR, Private Sector, Provincial Conservation authorities; research institutions, NGOs, communities • BioPANZA, SANBI, the Scientific Authority, research institutions, national and provincial conservation agencies
<p>1.3.2. Strengthen the contribution of the wildlife sector to the national economy and the NBES</p> <ul style="list-style-type: none"> • Expand membership of the Wildlife Forum, re-position it to serve as an effective interdepartmental/industry coordination platform, with the NBES as its implementation mandate • Streamline the regulatory environment and permitting system 	<ul style="list-style-type: none"> • DEA, WildLife Forum, sector stakeholders • DEA, provincial conservation authorities

<ul style="list-style-type: none"> • Map priority areas for transformation of the wildlife sector within the BENs and use these to guide implementation of the Biodiversity Economy Strategy • Strengthen links between the wildlife economy and biodiversity stewardship • Develop and implement guidelines or minimum requirements for ecologically friendly wildlife ranching, possibly linked to certification • Work with local communities to develop and implement business plans for wildlife economy projects in priority BENs (as determined in the NBES) 	<ul style="list-style-type: none"> • DEA, SANBI, SANParks, CPAs, DRDLR, District and Local municipalities • Wildlife Forum, provincial conservation authorities, CPAs, NGOs, private sector role-players, local chambers of commerce.
<p><i>1.3.5. Pilot Biodiversity Economy transformation nodes to demonstrate multiple benefits</i></p> <ul style="list-style-type: none"> • Undertake detailed mapping, determine strategic priorities, uptake areas and community priorities to operationalize at least 2 BENs (guided by the priorities identified in the NBES and WES), in conjunction with the Biosphere Reserve Programme and biodiversity stewardship programmes (including the Land Reform Biodiversity Stewardship Initiative) 	<ul style="list-style-type: none"> • DEA, SANBI, SANParks, provincial conservation authorities, biosphere reserves, CPAs, NGOs, private sector
<p>Outcome 1.4: Biodiversity conservation supports the land reform agenda and socio-economic opportunities for communal landholders</p>	
<p>Relevant high priority NBSAP activities:</p> <p><i>1.4.1. Strengthen the Land Reform Biodiversity Stewardship Initiative including approval of guidelines, strategies and implementation plans developed through the DEA-DRDLR-SANBI alliance</i></p> <p><i>1.4.2. Facilitate settlement of land claims in protected areas and the conservation estate</i></p>	
<p>Recommended acceleration measures</p>	<p>Implementation</p>
<p><i>1.4.1. Strengthen the Land Reform Biodiversity Stewardship Initiative including approval of guidelines, strategies and implementation plans developed through the DEA-DRDLR-SANBI alliance</i></p> <ul style="list-style-type: none"> • Finalise, formalise and implement the national strategy for the land reform and biodiversity stewardship initiative (LRBSI) • Resource and implement the Land Reform and Biodiversity Stewardship Initiative • Facilitate learning opportunities related to land reform and biodiversity stewardship with a focus on knowledge exchange and skills development for building a biodiversity economy 	<ul style="list-style-type: none"> • DEA-SANBI-DRDLR • DEA-SANBI-DRDLR • DEA-SANBI-DRDLR
<p><i>1.4.2. Facilitate settlement of land claims in protected areas and the conservation estate</i></p>	

<ul style="list-style-type: none"> • Finalize settlements and biodiversity stewardship agreements on land of high biodiversity value and set co-management agreements in place, according to provincial priorities identified in protected area expansion plans • Support land claimants on restituted land with the identification and development of sustainable wildlife economy or nature-based enterprises 	<ul style="list-style-type: none"> • National and provincial conservation authorities • Provincial conservation authorities, SANParks, biosphere reserve management agencies
<p>NBSAP Strategic Objective 2: Investments in ecological Infrastructure enhance resilience and ensure benefits to society</p>	
<p>Relevant national strategies/frameworks/systems: The Framework for Investing in Ecological Infrastructure, 2014; The Overarching Strategy and Implementation Plan for Ecosystem-based Adaptation, 2016; The National Action Plan to Combat Desertification and Land Degradation and Mitigate the Effects of Drought (version 2, 2016, in draft); The National Water Resource Strategy v.2, 2013; Strategy for dealing with biological invasions in South Africa, 2014; Framework for investment in environmental and natural resources (ENRM) for a green economy, 2016; Climate Change Adaptation Plans for Biomes in South Africa, 2015; The Biodiversity Sector Climate Change Response Strategy, 2014; the Water RDI Roadmap, 2015</p>	
<p>Outcome 2.1: Investments in ecological infrastructure enhance resilience and ensure benefits to society</p>	
<p>Relevant high priority NBSAP activities: 2.1.1. Support the implementation of Chapter 5 (water resource protection) of the National Water resource strategy 2.1.2. Develop a systematic approach including methods, techniques and expertise for mapping and prioritising ecological infrastructure 2.1.3. Scale-up and improve integration efforts to restore degraded ecological infrastructure and maintain ecological infrastructure in good condition</p>	
<p>Recommended acceleration measures</p> <p>2.1.1. Support the implementation of Chapter 5 (water resource protection) of the National Water resource strategy</p> <ul style="list-style-type: none"> • Secure Strategic Water Source Areas (SWSAs) through a range of mechanisms, including formal protection, land-use planning and environmental authorisations <ul style="list-style-type: none"> • Accelerate implementation of intensive wetland rehabilitation programmes, to protect priority wetlands and stimulate job creation 	<p>Implementation</p> <ul style="list-style-type: none"> • DAFF, EPWP, Working For programmes, DEA, DWS, CMAs, SANParks, provincial conservation authorities, municipalities • DEA, DWS, EPWP, SANBI, SANParks, Provincial

	conservation authorities, CMAs
<p>2.1.2. Develop a systematic approach including methods, techniques and expertise for mapping and prioritising ecological infrastructure</p> <ul style="list-style-type: none"> • Continue to invest in improving the National Wetland Inventory as part of the National Ecosystem Classification System • Develop and apply ecological infrastructure maps (including a focus on inland aquatic and coastal EI), as part of provincial spatial biodiversity planning and the National Biodiversity Assessment 	<ul style="list-style-type: none"> • SANBI, WfWet, CSIR, WRC, DST, SAEON, Research institutions, national and provincial conservation authorities, NGOs • SANBI, CSIR, WRC, SAEON, NGOs, researchers, scientists in national and provincial conservation authorities
<p>2.1.3. Scale-up and improve integration efforts to restore degraded ecological infrastructure and maintain ecological infrastructure in good condition</p> <ul style="list-style-type: none"> • Develop and implement strategic plans for maintenance and restoration of ecological infrastructure at a range of appropriate scales, including national, provincial and local • Integrate investment in ecological infrastructure into Catchment Management Strategies • Establish a National Alien and Invasive Species Co-ordination Forum • Strengthen the EI community of practice through knowledge sharing and information exchange, building on existing forums 	<ul style="list-style-type: none"> • DEA (including DEA's Environmental Programmes); SANBI; SANParks; provincial authorities; municipalities • DWS, CMAs, DEA, provincial authorities, municipalities • DEA, SANBI, DWS, Provinces, municipalities, CMAs, stakeholders • DEA, SANBI, DWS, Provinces, national and provincial conservation

	authorities, municipalities, CMAs, stakeholders
Outcome 2.2: Ecosystem-based adaptation is shown to achieve multiple benefits in the context of sustainable development	
Relevant high priority NBSAP activities: 2.2.1: Develop, fund and implement an implementation plan for ecosystem-based adaptation in the context of climate change adaptation and sustainable development	
Recommended acceleration measures	Implementation
2.2.1 Develop, fund and implement an implementation plan for ecosystem-based adaptation in the context of climate change adaptation and sustainable development <ul style="list-style-type: none"> Establish and maintain co-ordination mechanisms for implementation of the EbA Strategy, including the cross-sectoral Coordination Steering Committee (CCS) Build an active community of practice for EbA Implement priority activities of the EbA Strategy in line with resource availability 	<ul style="list-style-type: none"> DEA, SANBI, stakeholders SANBI, DEA, Adaptation Network, NGOs DEA, SANBI, stakeholders
NBSAP SO 3: Biodiversity considerations are mainstreamed into policies, strategies and practices of a range of sectors	
Relevant national strategies/frameworks/systems: The National Biodiversity Economy Strategy, 2017; Framework for investment in ENRM for a Green Economy, 2016, The Biodiversity and Climate Change Response Strategy, 2014; The National Strategy for dealing with Biological Invasions, 2014; The National Strategy for Combatting Wildlife Trafficking, 2017; Phakisa MPSG, 2014; The Compliance and Enforcement Strategy for the Environmental Monitoring Inspectorate, 2015; BIOFIN Plan, 2017; Water RDI Roadmap, 2015.	
Outcome 3.1: Effective science-based biodiversity tools inform planning and decision-making	
Relevant high priority NBSAP activities: 3.1.1. Develop new science-based tools to inform planning and decision making 3.1.2. Maintain new and existing science-based policy tools	
Recommended acceleration measures	Implementation

<p>3.1.1. Develop new science-based tools to inform planning and decision making</p> <ul style="list-style-type: none"> • Develop and apply biodiversity planning tools, including biodiversity sector plans, bioregional plans and biodiversity management plans (according to provincially determined priorities) • Develop biome-specific Biodiversity and Climate Change Adaptation Action Plans (building on the recommendations in DEAs 2015 Report on CCA Plans for South African Biomes) 	<ul style="list-style-type: none"> • SANBI, DEA, CSIR, researchers, SANParks, provincial conservation authorities, municipalities, NGOs, • DEA, SANBI, CSIR, SAEON, researchers, provinces
<p>3.1.2. Maintain new and existing science-based policy tools</p> <ul style="list-style-type: none"> • Review and update provincial biodiversity sector plans and published bioregional plans in line with provincially-determined plans and priorities, and mainstream into land-use planning and decision-making 	<ul style="list-style-type: none"> • SANBI, DEA, provincial conservation authorities, municipalities
<p>Outcome 3.2: Embed biodiversity considerations into national, provincial and municipal development-planning and monitoring</p>	
<p>NBSAP Priority activities:</p>	
<p>3.2.1: Integrate biodiversity into tools being implemented to support environmental decision-making for SIPs</p>	
<p>3.2.3: Integrate biodiversity priority areas into integrated coastal management plans and offshore plans</p>	
<p>3.2.4 Develop and publish guidelines for invasive species monitoring, control and eradication plans</p>	
<p>3.2.6. Integrate biodiversity priority areas into spatial development frameworks, integrated development plans and land-use schemes</p>	
<p>Recommended acceleration measures</p>	
<p>3.2.1 Integrate biodiversity into tools being implemented to support environmental decision-making for SIPs</p> <ul style="list-style-type: none"> • Ensure that appropriate biodiversity information is included in Strategic Environmental Assessments for SIPs • Ensure application of the new EIA screening tool² by EAPS • 	<p>Implementation</p> <p>DEA, The Presidency, SANBI, provincial environment departments and conservation authorities, other relevant government departments and public entities, EA consultants</p>

² The 2014 Environmental Impact Assessment Regulations (Sect. 16 [1][b][v]) require that all applications for an environmental authorisation be accompanied by , *inter alia*, a report generated by the national, web-based environmental screening tool. The screening tool uses spatial environmental data (with different categories of data applicable to different kinds of applications), to determine if the application for authorisation (Basic Assessment, Scoping or Environmental Impact Assessment) has considered the major environmental issues at the proposed land-use site.

<p>3.2.3 <i>Integrate biodiversity priority areas into integrated coastal management plans and offshore plans</i></p> <ul style="list-style-type: none"> • Ensure that appropriate biodiversity information is included in marine spatial plans developed in terms of the marine spatial planning framework • Develop and apply implementation plans and enforcement measures for the marine spatial planning framework (as per Phakisa MSPG) 	<p>Oceans Secretariat, DEA (MCM), SANBI, DAFF, sector bodies, provincial environmental departments and municipalities)coastal</p>
<p>3.2.4 <i>Develop and publish guidelines for invasive species monitoring, control and eradication plans</i></p> <ul style="list-style-type: none"> • Develop and implement National Control Plans for listed species, as per priorities determined by DWS • Develop invasive species control plans for all national parks and buffer zones and prioritised provincial nature reserves 	<p>DEA, SANBI, provincial environment departments, municipalities</p>
<p>3.2.6 <i>Integrate biodiversity priority areas into spatial development frameworks, integrated development plans and land-use schemes</i></p> <ul style="list-style-type: none"> • Support inclusion of biodiversity priority areas into planning instruments developed in terms of the Spatial Planning and Land Use Management Act (SPLUMA , Act 16 of 2013) • Finalise and support implementation of the standard requirements for biodiversity information as part of the environmental layer in SDFs • Integrate biodiversity priorities into land capability and agricultural zoning through mainstreaming of systematic biodiversity plans • Develop ecosystem guidelines³ for environmental assessment and land-use planners and decision makers, and mainstream their use in integrated environmental management and land-use planning 	<ul style="list-style-type: none"> • DEA, SANBI, DRDLR, provincial conservation authorities • DEA, SANBI, DRDLR, provincial conservation authorities • DEA, SANBI, DAFF, provincial departments and conservation authorities, municipalities • SANBI, researchers, provincial environment departments and conservation authorities, municipalities,

³ Ecosystem Guidelines provide practical guidance and a consistent framework for addressing the biodiversity-related aspects of land-use planning, landscape management and environmental regulation. They enable users to contextualize and interpret spatial biodiversity priorities, understand the key drivers of ecosystem functioning, understand what the acceptable limits of change are in particular ecosystems or landscapes, and interpret how those need to be managed and monitored to ensure that biodiversity and ecosystem processes are adequately safeguarded. Ecosystem Guidelines have been developed for the Western Cape and for the Grassland Biome, and new guidelines are planned for the Savanna and Thicket Biomes.

<ul style="list-style-type: none"> • Develop and implement relevant training programmes to strengthen capacity in all relevant institutions for use of existing and new tools to integrate biodiversity into planning and decision making in multiple sectors 	environmental assessment practitioners <ul style="list-style-type: none"> • DEA, SANBI, training institutions, NGOs, government departments in all spheres, private sector
Outcome 3.3: Strengthen and streamline development authorisations and decision-making	
Relevant high priority NBSAP Activities:	
<i>3.3.3. Identify areas of high sensitivity where certain types of development are prohibited</i>	
Recommended acceleration measures	
<i>3.3.3. Identify areas of high sensitivity where certain types of development are prohibited</i>	
<ul style="list-style-type: none"> • Complete the process for listing one or more of Strategic Water Source Areas in terms of Section 24 (2)(a) of NEMA • Use CMA Maps and accompanying land-use guidelines to identify and inform decision-making about areas where development that results in loss of natural habitat should be avoided • Capture ecological infrastructure features in provincial biodiversity plans/biodiversity sector plans/bioregional plans 	Implementation <ul style="list-style-type: none"> • DEA, DWS, DMR, relevant provincial conservation authorities, CSIR, NGOs • Competent environmental authorities in terms of NEMA, provincial conservation authorities, SANBI • SANBI, Provincial conservation authorities municipalities
Outcome 3.4: Compliance with authorisations monitored and enforced	
Relevant high priority NBSAP activities	
<i>3.4.1. Strengthen environmental regulatory and compliance frameworks</i>	
<i>3.4.2. Implement the Environmental Compliance and Enforcement Strategy</i>	
<i>3.4.4. Improve the enforcement of trade regulations</i>	
Recommended acceleration measures	
<i>3.4.1. Strengthen environmental regulatory and compliance frameworks</i>	
<ul style="list-style-type: none"> • Update and apply the national legal framework for monitoring and enforcement 	Implementation

<ul style="list-style-type: none"> Strengthen links between EMI institutions and make them more accessible to the public (for example through use of the E-Legislation (NEMA/SEMA) tab on the DEA website) 	DEA, SANParks, provincial conservation agencies, provincial environment departments
<p>3.4.2.</p> <ul style="list-style-type: none"> Secure approval for, implement, and monitor the Compliance and Enforcement Strategy for the Environmental Management Inspectorate⁴ 	DEA, DAFF, DWS, SAPS, SSA, provincial conservation agencies and environmental departments, customs, municipalities
<p>3.4.4.</p> <ul style="list-style-type: none"> Approve and implement the National Integrated Strategy to Combat Wildlife Trafficking Implement CITES decisions and amended resolutions relating to rhino, elephants, pangolin and cycads <ul style="list-style-type: none"> Maintain CITES inspection and permit issuing offices in provinces 	<ul style="list-style-type: none"> DEA DEA, Scientific Authority, SANParks, provincial conservation agencies Scientific Authority, provincial conservation authorities and environmental departments
<p>Outcome 3.5: Appropriate allocation of resources in key sectors and spheres of government facilitates effective management of biodiversity, especially in biodiversity priority areas</p>	
<p>Relevant high priority NBSAP activities: 3.5.2. Develop a resource mobilisation strategy for biodiversity</p>	
<p>Recommended acceleration measures</p>	
<p>3.5.2.</p> <ul style="list-style-type: none"> Finalise, approve and implement the BIOFIN Finance Plan 	<p>Implementation</p> <ul style="list-style-type: none"> DEA, National Treasury, SANBI
<p>Outcome 3.6: Biodiversity considerations are integrated into the development and implementation of policy, legislative and other tools</p>	

⁴ A *National Compliance and Enforcement Strategy for the Environmental Management Inspectorate* was developed by DEA in 2014. It is based on 7 core principles to guide the work of the Inspectorate, and enhance its effectiveness between 2015 and 2020.

Relevant NBSAP high priority activities:	
3.6.1. Develop, implement, review and update legislative and other tools that ensure the protection of species and ecosystems	
3.6.2. Integrate the value of biodiversity into national accounting and reporting systems	
3.6.3. Integrate biodiversity into sector policies and legislation	
Recommended acceleration measures	Implementation
3.6.1. Develop, implement, review and update legislative and other tools that ensure the protection of species and ecosystems	DEA
<ul style="list-style-type: none"> Complete, approve and publish the National Biodiversity Offsets Policy Finalize, approve and publish the amendments to NEMA that are currently under development 	
3.6.2. Integrate the value of biodiversity into national accounting and reporting systems	<ul style="list-style-type: none"> DEA, CSIR, SANBI, relevant experts Statistics South Africa, SANBI, DEA, DWS
<ul style="list-style-type: none"> Develop and undertake a strategic set of studies to assess the economic contribution to biodiversity conservation and management to the economy, building on existing work Develop a National Strategy for Ecosystem Accounting as part of South Africa's participation in the EU-funded project Natural Capital Accounting and Valuation of Ecosystem Services 	
3.6.3. Integrate biodiversity into sector policies and legislation	<ul style="list-style-type: none"> DEA, DAFF, SANBI, DEA, DMR, SANBI
<ul style="list-style-type: none"> Support inclusion of biodiversity priority areas in agricultural policy, legislation and spatial tools Support implementation of the Mining and Biodiversity Guideline 	
NBSAP SO4: Mobilise people	
Relevant national strategies/frameworks/information systems:	
National Plant Conservation Strategy, 2015; National MAB Reserve Strategy, 2016	
Outcome 4.1: People's awareness of the value of biodiversity is enhanced through more effective co-ordination and messaging	
Relevant high priority NBSAP activities:	
4.1.1. & 4.1.2. Develop, fund a co-ordinated national biodiversity communications, education and awareness strategy, implementation plan and monitoring framework	
4.1.3. Strengthen environmental literacy through citizen science programmes	
Recommended acceleration measures	Implementation

<p>4.1.1. & 4.12. Develop, fund a co-ordinated national biodiversity communications, education and awareness strategy, implementation plan and monitoring framework</p> <ul style="list-style-type: none"> Develop, resource and implement a co-ordinated national biodiversity communications, education and awareness strategy, implementation plan and monitoring framework to co-ordinate communication work in the sector, building on the work done in the "Making the Case" project previously undertaken by DEA and SANBI 	<ul style="list-style-type: none"> DEA, SANBI, NGOs, tertiary and research institutes
<p>4.1.3 Strengthen environmental literacy through citizen science programmes</p> <ul style="list-style-type: none"> Strengthen the work of citizen science programmes by establishing a national citizen science forum for information exchange, learning, strategic prioritization Strengthen support to Biosphere Reserves, Marine Hope Spots, and other landscape-initiatives as vehicles for promoting awareness and behaviour-change and supporting citizen science programmes, especially through engagement of youth 	<ul style="list-style-type: none"> SANBI, DST, NGOs, national collections institutions (museums, herbaria) DEA, SANParks, Conservation authorities, NGOs
<p>NBSAP SOS: Conservation and Management of Biodiversity is improved through the development of an equitable and suitably skilled workforce</p>	
<p>Relevant strategies/frameworks/systems: The Biodiversity Human Capital Development Strategy, 2010; Environmental Sector Skills Development Plan, 2010; Strategy for Gender Mainstreaming in the Environmental Sector, 2010; IPBES</p>	
<p>Outcome 5.1: Macro-level conditions enabled for skills planning, development and evaluation</p>	
<p>Relevant high priority NBSAP activities: 5.1.3. Develop and integrate existing mechanisms for the monitoring and evaluation of biodiversity human capital development initiatives 5.1.4. Ensure that national strategies receive adequate finding and support</p>	
<p>Recommended acceleration measures 5.1.3. and 5.1.4.</p> <ul style="list-style-type: none"> Support the further development and implementation of an effective and sustainably-funded national-level co-ordination mechanism for biodiversity human capital development and monitoring 	<p>Implementation</p> <ul style="list-style-type: none"> DEA, NESPF, SANBI, DST, DWS, DBSA, DPME, NRF, Greenmatter DEA, NESPF, DST

<ul style="list-style-type: none"> Ensure that capacity building needs for implementation of IPBES recommendations are matched with resources through catalysing financial and in-kind support 	
Outcome 5.2: An improved skills development system incorporates the needs of the biodiversity sector	
Relevant high priority NBSAP activities:	
5.2.1. <i>Develop and implement an updated BHCD Plan in support of the BHCDs</i>	
Recommended acceleration measure	Implementation
5.2.1	
<ul style="list-style-type: none"> Develop an updated Biodiversity Human Capital Development Implementation Plan 	<ul style="list-style-type: none"> DEA, SANBI, NESPF, GreenMatter
NBSAP SO6: Knowledge foundations	
Relevant national strategies/ frameworks/systems:	
IPBES; The National Biodiversity Research and Evidence Strategy, 2015; Environmental Sector Research, Development and Evidence Strategy, 2015; The National Plant Conservation Strategy, 2015; The National Biodiversity Monitoring Framework (under development); The National Biodiversity Ecosystem Classification System (under development); The National Biodiversity Information System	
Outcome 6.1: Relevant foundational datasets on species are in place and well-co-ordinated	
Relevant high priority NBSAP activities:	
6.1.5. <i>Maintain and formalise the National Ecosystem Classification System (also with relevance to Outcome 6.5)</i>	
Recommended acceleration measures	Implementation
6.1.5.	
<ul style="list-style-type: none"> Formalize, implement and maintain the National Ecosystem Classification System 	SANBI, DEA, SANParks, DST, NRF, CSIR, museums and herbaria, provincial authorities, universities, NGOs
Outcome 6.2: The status of species and ecosystems is regularly monitored and assessed	
Relevant high priority NBSAP activities	
6.2.3. <i>Develop and implement methods and approaches for assessing the status of ecological infrastructure</i>	
6.2.5. <i>Regularly map key pressures on biodiversity, including landcover change, pressures in the marine environment (fisheries, trawling, mining) and distribution of invasive species</i>	

6.2.6. Monitor and report on the state of ecosystems and species, including the status and trends for priority harvested marine resources, impact of trade in wildlife and wild plants on biodiversity including change in TOPS- and CITES-listed species, invasive alien species and their impacts and the effectiveness of control measures, change in status of Red Listed species, impacts of GMOs on biodiversity assets and ecological infrastructure, and the impacts of climate change on species and ecosystems.

6.2.7. Revise and update the National Biodiversity Assessment at least every seven years

Recommended acceleration measures

Cross-cutting:

<ul style="list-style-type: none"> • Complete, adopt and apply the National Biodiversity Monitoring Framework (under development, due for release in 2018) • Complete and publish the NBA 2018 (due for release in 2019), and mainstream into policy and planning at provincial and local levels • Identify, develop and build further on large-scale, long-term monitoring monitoring datasets 	<ul style="list-style-type: none"> • SANBI, DEA, SANParks, Provincial conservation authorities, Scientific Authority • SANBI, DEA, SANParks, Provincial conservation authorities and environment departments • SAEON, SANBI, DEA, CSIR, research institutions and centres of excellence, SANParks, provincial conservation authorities and environment departments

Section 4: Mechanisms for Co-ordination, Cooperation and Implementation

The importance of working through strong, collaborative partnerships is a key principle underlying this NBF. Cross-institutional partnerships create a sense of common purpose, facilitate alignment and more strategic allocation of limited resources, and build cohesion at a larger scale. They also make it possible to leverage greater implementation capacity than is possible when institutions act in isolation.

4.1. National mechanisms for coordination in the sector

National mechanisms for co-ordinating the work of the biodiversity sector include government-led committees, working groups and task teams that facilitate strategy and policy coherence, and co-operation between key institutions responsible for biodiversity management and conservation. The work of these structures is complemented by numerous other structures and task teams that operate provincially, locally, or internally within specific institutions or multi-stakeholder programmes, to co-ordinate implementation and operational workplans. Some of the key **national-level structures** relevant to co-ordination of the work of the biodiversity sector are included in **Table 6**, below.

Key amongst these, in the context of the NBF, is **MinTECH Working Group 1 (Biodiversity and Conservation)**, whose remit includes expansion of the conservation estate, mitigation of threats to biodiversity and ecosystems, ecosystem services, biodiversity legislation and regulation, and sustainable use of ecosystems. However, given the broad scope of the NBSAP, and the other strategies and frameworks that are in effect in the biodiversity sector, the deliberations of other working groups also have relevance, in particular WG 3 (Planning and Coordination), WG 4 (Compliance and Enforcement), WG 5 (Environmental Impact Management and Water Affairs), WG 6 (Environmental Jobs), WG 7 (Education, Development and Information Management), WG 8 (Oceans and Coasts), and WG 10 (Climate Change).

Table 6: Key national coordination mechanisms operating in the biodiversity sector

Committee/Task Team	Role, participants, frequency of meetings
Minister and Members of Executive Councils (MinMEC) Committee	Committees to promote co-operative governance between national ministers and their counterparts (MECs) at provincial level. The Environmental MinMEC comprises the Minister of Environmental Affairs, the Director-General of DEA, and the provincial MECs for Environmental Affairs. MinMEC committees meet quarterly.
Ministerial Technical Committee (MinTECH)	Forums to facilitate coordination, policy and strategy coherence between national and provincial departments. The environmental MinTECH comprises the DG of DEA, representatives of public entities including SANBI and SANParks, and heads of provincial departments responsible for environmental management and biodiversity conservation. MinTECH committees meet quarterly.
MinTECH Working Groups	These working groups bring together senior officials in national and provincial government at quarterly meetings to discuss and advise on technical issues relating to Biodiversity and Conservation (WG1), Air Quality (WG2), Planning and Coordination (WG3), Compliance and Enforcement (WG4), Environmental Impact Management and Water (WG5), Environmental Sector Jobs (WG6), Education, Development and Information Management (WG7), Oceans and Coasts (WG 8), Waste and

Committee/Task Team	Role, participants, frequency of meetings
	<p>Chemical Management (WG 9), Climate Change (10), Environmental Policy and Law Reform (WG11), Communications (WG12). Meetings are held quarterly.</p> <p>Ad hoc task teams are convened under these working groups to deal with specific issues, according to need.</p>
Protected Area CEO's Forum	<p>Convened by DEA, with the DDG: Biodiversity and Conservation as chairperson, this Forum promotes co-operative governance between national and provincial government departments and agencies in relation to protected area management. It serves as an advisory body to Environment MINTECH and MINMECH. The broad remit of the Forum is to co-ordinate the development of protected areas in ways that promote synergies on operational and strategic issues, support effective protected area management, build capacity and promote transformation in the sector. The Forum is responsible for coordinating the implementation of protected area expansion strategies, implementing strategic decisions of relevant international and regional bodies and programmes, setting up monitoring programmes, and for sharing information, ideas and experiences on issues of common interest to protected area management authorities. Membership of the Forum includes the Chief Executive Officers (CEOs) and nominated representatives from Protected Area Management Authorities, and nominated delegates from DEA, SANBI and provincial departments. The Forum may appoint sub-committees and task teams to address specific issues, and may engage technical experts as needed. The Forum convenes twice yearly.</p>
Protected Areas Technical Task Team (PATT)	<p>This Task Team serves to ensure cooperation and implementation of MinMEC recommendations relating to legal and spatial issues affecting protected areas in the country (for example determination of protected area boundaries), and to ensure effective alignment of activities of all protected area management authorities in terms of the Protected Areas Act. Some of its specific functions are to: provide technical inputs to the development of relevant norms and standards and regulations, review the NPAES and the development and implementation of provincial counterparts, coordinate annual reporting to MinTECH WG1 under Outcome 10, and share databases and information. The Task Team is convened at least twice a year by DEA and participants include SANParks, Isimangaliso Wetland Park Authority and representatives of provincial conservation authorities.</p>
Biodiversity Stewardship Technical Working Group (BDS TWG)	<p>This working group, which is convened twice a year by SANBI, addresses technical, legal, policy and operational challenges faced by biodiversity stewardship programmes that are operating in the provinces. The working group refers relevant issues to the Protected Areas Task Team for further consideration and action. Membership of the working group includes SANBI, DEA, SANParks, provincial conservation authorities, relevant NGOs.</p>
People and Parks Steering Committee	<p>The People and Parks Steering Committee, which is convened by DEA at least once a year, oversees the operations of the People and Parks Programme. It deals with issues relating to: the settlement of land claims in protected areas; strengthening governance, participation, access and benefit sharing; and, the development and implementation of an awareness-raising and capacity building strategy. Membership includes government and community representatives. A number of Regional Committees and Park Forums (convened by SANParks) meet quarterly, or at intervals specific to particular Parks, to engage communities and address</p>

Committee/Task Team	Role, participants, frequency of meetings
	issues that have bearing on the collective good of the Park and its adjacent communities
The South African Biosphere Reserve Committee	<p>Chaired by the DDG: Biodiversity and Conservation within DEA, this Committee operates in accordance with an approved terms of reference to oversee implementation of the Man and Biosphere Programme in South Africa. It oversees the implementation of the MAB Strategy and Implementation Plan, reviews effectiveness, and deals with strategic issues. It also promotes cooperation, coordination and communication between biosphere reserves. Meetings take place twice a year. Membership includes representatives from DEA, biosphere management agencies and provincial forums, provincial conservation authorities, SALGA, CoGTA and a representative from the SA national commission to UNESCO.</p> <p>Operating in association with the Committee is a small Management Committee (to implement resolutions) and provincial MAB Forums, which are platforms for cooperation, networking, information exchange and lesson-sharing relevant to specific Biosphere Reserves.</p>
Interdepartmental Committee on Inland Water Ecosystems	This committee was formed in 2011 to share and effectively influence joint water resource management issues and decisions regarding inland water ecosystems, in a proactive manner. It is convened by DWS, with membership drawn from: DWS, DEA, SANBI, SANParks, DAFF, WRC and CMAs. It meets twice a year.
The Scientific Authority	<p>The Scientific Authority, has been established under Section 60 of the Biodiversity Act, to assist with regulating and restricting trade in TOPS- and CITES-listed species. It is administered by SANBI. Membership includes representatives from DEA, SANBI, provincial conservation authorities, SANParks and national zoological gardens. Regular meetings are held twice a year, with special meetings convened according to need.</p> <p>The Authority is active in all provinces, and participates in relevant international meetings (e.g. CITES). Its main functions are to: monitor the legal and illegal trade in listed species; make recommendations to issuing authorities on applications for permits to undertake restricted activities with TOPS species; make and publish non-detriment findings on the impact of trade on the survival of species in the wild; assist with identifying species in trade and issue certificates in which the identification of a specimen is verified as being taxonomically accurate.</p>
National Ecosystem Classification Committee	The National Ecosystems Classification Committee, which is chaired by SANBI, is a technical working committee that oversees the ongoing development of the National Ecosystem Classification System. It has subcommittees that deal with specific realms, including freshwater, estuarine, coastal and marine ecosystems. The work of these committees is to identify, map and describe a standardised set of ecosystems types that will serve as consistent units of reference in a wide range of assessment, planning, policy, decision-making and management processes in the biodiversity sector. Participants include relevant experts from SANBI, DEA, DWS, DAFF, SANParks, PCAs, CSIR, SAEON, WRC, SAIAB and universities.

4.2 National communities of practice for knowledge sharing

Communities of practice are vital mechanism for co-ordinating, enriching and advancing the work of the sector and ensuring a consistent approach in the operating environment. As such, they are directly relevant to supporting the purpose of the NBF. There are numerous communities of practice operating at different scales in the country; those included in **Table 7**, below, are the key *national forums* of relevance under the six strategic objectives of the NBSAP.

Table 7: Communities of Practice that operate nationally to facilitate cooperation, lesson-sharing and knowledge exchange in the biodiversity sector

Name of CoP	Convenor(s)	Participants	Frequency of meetings
People and Parks Forum	SANParks/DEA	SANParks, local communities, private sector role-players, provincial conservation authorities, local businesses and other stakeholders living adjacent to national parks	Every two years
<p>Core business: The People and Parks Forum brings together all relevant role-players at a conference every two years to share experiences and best practices, exchange information, identify issues of common concern and propose solutions with regard to implementation of the People and Parks Programme. Issues of key concern include: co-management arrangements and other aspects of landscape management, settlement of land claims, access and benefit-sharing, developing opportunities for strengthening the rural economy, youth conservation and the Kids in parks project, and other issues of mutual interest and concern.</p> <p>Aligned with NBSAP SO 1, Outcome 1.1, 1.3 and 1.4</p>			
Marine Protected Areas Forum	DEA; Oceans and Coasts	Government, MPA Management Agencies (SANParks, provincial conservation agencies, metros), Research Organizations (SAIAB, SAEON, ORI) and Academia, NGO's (WWF), Coastal Communities	Annual Forum, and training events
<p>Core business: To foster collaboration and information sharing between MPA stakeholders in Southern Africa to enable implementation of an integrated, multi-stakeholder approach to MPA Governance in Southern Africa, and improve MPA management effectiveness and capacity development.</p> <p>The mission of the South African MPA Forum is to work with all the role players in the SA MPA sector to maintain and improve communication, management and training of staff in all our MPAs. The Forum, which is managed by a Secretariat which identifies priority projects that require implementation by the full-time MPA Coordinator.</p> <p>Aligned with NBSAP SO 1, Outcome 1.1</p>			
The Wildlife Forum	DEA	DEA, DAFF, provincial conservation and environmental authorities, SAPS, representatives of the organized and wildlife hunting industry	Quarterly
<p>Core business: The Wildlife Forum's purpose is to promote conservation through sustainable use of renewable wildlife resources; contribute to building a responsible, self-regulatory wildlife and hunting sector; promote sustainable growth in wildlife-related tourism, with equitable benefit sharing; and, create enabling conditions for transformation of the sector. The Forum makes inputs to relevant law-making processes, alerts government to issues on which collaboration or improvement is needed, and facilitates collaboration and cooperation within the industry. The Forum appoints standing or <i>ad hoc</i> sub-committees or technical teams to deal with specific issues according to need.</p>			

National Biodiversity Framework

January 2018

Name of CoP	Convenor(s)	Participants	Frequency of meetings
Aligned with NBSAP SO 1, Outcome 1.3 and 1.4			
BioPANZA (Bioproducts Advancement Network)	DEA, and co-chaired by DST and Dti	Government and industry roleplayers	Twice per year
<p>BioPanza has been established as a mechanism to promote applied research, local processing, innovation and product development in the bioprospecting/biotrade sector. The network brings together relevant government and industry roleplayers in partnerships to harness existing initiatives, address the innovation chasm and ensure access to bioproducts resources and equitable benefit-sharing. BioPANZA will work closely with the Bioprospecting Forum. [to be launched in 2018, though some functions have been operationalised].</p> <p>Aligned with NBSAP SO1, Outcomes 1.3 and 1.4</p>			
Bioprospecting Forum	DEA	Industry, traditional knowledge holders, academia, NGOs and relevant government institutions	Twice per year
<p>Core business: The Bioprospecting Forum (the formation of which was identified as a priority in the National Biodiversity Economy Strategy), is a platform that promotes coordination and facilitates formal communication and information exchange between sector role-players on matters and challenges facing the bioprospecting/biotrade industry. Forum membership is by invitation from the Secretariat (DEA), but other individuals/institutions may be invited to make presentations at Forum meetings, upon request from the members. The Forum has two objectives: (i) implementation of the bioprospecting/biotrade aspects of the National Biodiversity Economy Strategy; and, (ii) the implementation of the Biodiversity Economy Indaba Action Plan (this is an Action Plan arising from the Biodiversity Economy Indaba, which is convened annually).</p> <p>A number of Working Groups also operate under the aegis of the Forum, to tackle specific issues and propose possible solutions, in relation to: Discovery, Bioprospecting Best Practices in the Natural Products Sector; Permitting; and, Traditional Knowledge and Benefit-Sharing. Working Groups are convened on a needs-driven basis, and participation is open to all relevant, interested parties.</p> <p>Aligned with NSAP SO 1, Outcomes 1.3 and 1.4</p>			
The Adaptation Network	Environmental Monitoring Group	Government, public and private entities, civil society groups, academics, businesses	variable
<p>Core business: Founded in 2009, the Adaptation Network is a creative platform for sharing experiences, learning opportunities and practical approaches and frameworks relating to climate change adaptation. Its operation is governed by a Steering Committee which is elected at annual general meetings.</p> <p>Aligned with NBSAP SO 2, Outcome 2.2</p>			
Freshwater Ecosystem Network	SANBI	Representatives from government, national and provincial agencies, NGOs and the private sector.	Annual
<p>Core business: The Freshwater Ecosystem Network (FEN) was established in 2013 and is a community of practice related to freshwater ecosystems. The idea for the network emerged from a consultation process involving key role-players in the freshwater ecosystem sector. The forum serves to stimulate and support collaborative efforts and networks and is a platform for joint learning, coordination and networking around freshwater ecosystems.</p> <p>Aligned with NBSAP SOs 2 and 3</p>			

National Biodiversity Framework

January 2018

Name of CoP	Convenor(s)	Participants	Frequency of meetings
The National Biodiversity and Business Network (NBBN)	EWT (in partnership with DEA)	Founding partners, supporting partners and members draw from the business community and NGO networks	Annual Biodiversity and Business Indaba, and other meetings as relevant
<p>Core business: The aim of the Network is to assist businesses from various sectors to integrate and mainstream biodiversity issues into their strategies and operations. It is designed to be an open and inclusive association of likeminded organisations that have recognised the need to raise awareness of, and stimulate conversation about, biodiversity issues amongst the business community. The primary role of the Network is to bring national stakeholders in business and biodiversity together to share ideas and engage in dialogue, with the following objectives: provide a national platform to facilitate strategic discussions about biodiversity and business; create national momentum about mainstreaming biodiversity considerations into businesses; facilitate the development of a national agenda in terms of biodiversity and business; facilitate cohesion and integration in the discussion and agenda about biodiversity and business; and, facilitate focused, pragmatic and useful interventions to support businesses in the mainstreaming process.</p> <p>The EWT is spearheading the activities of the NBBN in alignment with the model of the Global Partnership for Business and Biodiversity of the Convention on Biological Diversity and in collaboration with the founding and supporting partners, as well as the other members of the Network.</p> <p>Aligned with NBSAP SOs 1 (especially Outcome 1.3), 2 and 3</p>			
Biodiversity Planning Forum	SANBI	Biodiversity planners in government, NGOs and private sector; scientists; land-use managers and conservationists; students	Annual conference
<p>Core business: The Biodiversity Planning Forum was established in 2004. It provides an opportunity for individuals, agencies and departments involved in spatial biodiversity planning to share and synthesise valuable lessons from biodiversity planning projects across South Africa. The Forum is intended primarily for those involved in producing or using biodiversity planning products. Although the core focus of the Forum is on systematic biodiversity planning a key theme is planning for implementation. The Forum attracts practitioners, scientists and managers from a range of institutions and organisations including national, provincial and local government, conservation NGOs, universities and research institutes and independent biodiversity planning consultants. The Forum encourages students and interns to attend and offers funding, when possible, to support student involvement.</p> <p>Each year the Forum identifies key issues that are presented, discussed and debated in plenary and parallel sessions.</p> <p>Aligned with NBSAP SOs 1,2,3 and 6</p>			
Provincial and Metro Biodiversity Planning Working Group	SANBI	Biodiversity planners from government departments, provincial environment departments and conservation authorities, local governments, private consultancies and NGOs, individual experts	Workshop approximately annually, more frequently if required.
<p>Core business: The Working Group convenes approximately annually to discuss and resolve technical and process issues related to biodiversity planning and to ensure sufficient consistency across provinces and metros to maintain the usefulness and integrity of biodiversity plans. Its work draws from and feeds into the Biodiversity Planning Forum.</p> <p>Aligned with NBSAP SOs 3 and 6</p>			

National Biodiversity Framework

January 2018

Name of CoP	Convenor(s)	Participants	Frequency of meetings
SA Mining and Biodiversity Forum	SAMBF and Chamber of Mines	Mining industry role-players, conservationists, government departments	¾ times per year
<p>Core business: The Mining and Biodiversity Forum was established in 2005 to enhance biodiversity management in the mining industry. The Forum brings together all key role-players with the aim of facilitating cross-sectoral interaction and cooperation to improve biodiversity management and conservation, management and performance of the mining sector. The Forum was a key partner in the development of the Mining and Biodiversity Guidelines published in 2015.</p> <p>Aligned to NBSAP SO 3, especially Outcome 3.5</p>			
National Environmental Skills Planning Forum (NESPF)	DEA	Relevant government departments and other public entities, NGOs, institutes and universities	Quarterly
<p>Core business: The Forum brings together role-players that are actively engaged in catalysing and supporting nationally relevant skills development planning interventions. The Forum has 3 goals, which are to: raise and deliberate on matters that need to be addressed at national level; initiate action to ensure that resources are allocated to address these issues; and, respond to the absence of a dedicated SETA and skills-focussed professional body in the environmental sector, and advise on implementation of the Environmental Sector Skills Plan.</p> <p>Aligned with NBSAP SO 5 (cros- cutting)</p>			
National Biodiversity Evidence and Research Indaba	DEA	Government departments (national, provincial, local), SANBI, CSIR, NRF, universities and research institutions, NGOs, business partners	Annual
<p>The Indaba provides an annual opportunity to report on progress and share knowledge and experiences related to research and evidence needs and priorities identified in the National Biodiversity Research and Evidence Strategy.</p> <p>Aligned with NBSAP SO 6</p>			
Biodiversity Information Management Forum	Convenor: SANBI	Biodiversity information managers from local, provincial and national government departments, universities, research institutions, museums, conservation bodies and NGOs	Annual
<p>Core business: The Biodiversity Information Management Forum (BIMF) is the only national platform dedicated to discussing biodiversity information management issues. The BIMF brings together key role-players in biodiversity information management to ensure initiatives are aligned, co-ordinated and relevant in a rapidly changing world. The BIMF offers opportunities for strategic thinking, innovation, knowledge sharing, training and networking. It is primarily aimed at people who are involved in mobilising, managing, serving and using biodiversity information. While the primary focus is on South African issues, the forum has been enriched by delegations from African and other countries that have shared their knowledge and expertise and brought an international perspective.</p> <p>Aligned with NBSAP SO 6</p>			

Name of CoP	Convenor(s)	Participants	Frequency of meetings
Management, Research and Planning Forum (MAREP)	Convenor: SANBI	Researchers, planners, managers and practitioners involved in natural resource management	Several times a year
Core business: The MAREP brings together researchers, managers and other practitioners involved in natural resource management, including in DEA's Environmental Programmes. MAREP meetings are held at both national and regional levels, and deal with a range of strategic thematic areas relevant to natural resource management, providing a platform for strengthening the links between research and practice.			
Aligned with NBSAP SO 2			

Strengthening and expanding communities of practice

Strengthening opportunities for lesson-sharing and knowledge exchange is identified as a priority activity in most of the strategies reviewed in the NBF. Some areas of work currently do not have established communities of practice at national scale and these should be prioritised. Amongst these is biodiversity stewardship (see below). It is further recommended that priority be given to identifying and addressing other gaps in the community-of-practice network, with special attention to ensuring greater social inclusiveness.

Building a national community of practice for Biodiversity Stewardship

Biodiversity stewardship has become firmly established as a cost-effective and socially-inclusive way of bringing land of high biodiversity value under protection or improved biodiversity management, with benefits for stimulating rural economies (SANBI, 2017b). The NPAES 2016 reveals that biodiversity stewardship agreements account for 67 percent of the land that has been added to the protected area estate over the last 10 years, and that biodiversity stewardship is likely to be the dominant mechanism for achieving further expansion and consolidation of protected areas into the future.

It is a direct recommendation of the Business Case for Biodiversity Stewardship (SANBI, 2017b) that the community of practice for biodiversity stewardship should be strengthened and expanded. Currently, the Biodiversity Stewardship Technical Working Group plays a role in creating a community of practice to support sharing of experience and lessons, and biodiversity stewardship working groups operate in some provinces, such as the Western Cape and KwaZulu-Natal. However, there is no formalised, national-level community of practice for biodiversity stewardship, though a successful, inaugural national biodiversity stewardship conference was convened by SANBI and other partners in September 2017.

Following the recommendations made in the Business Case, it is **recommended** that priority should be given to supporting the development of a fully-fledged national community of practice for biodiversity stewardship that meets annually (in a manner similar to the Biodiversity Planning Forum).

4.3 Mechanisms for co-ordination at sub-national level

There are many forums, communities of practice and other partnerships and networks operating at sub-national level in the biodiversity sector. The NBF identifies two main areas of opportunity for enhancing co-ordination at regional and sub-regional scale, to achieve greater site-level impact. These are: linking the NBSAP to action plans at provincial and local level; and, strengthening multi-stakeholder partnerships.

4.3.1 Linking the NBSAP to action plans at provincial and local level

Provinces and municipalities may choose to develop Biodiversity Strategy and Action Plans (PBSAPs and LBSAPs). The NBSAP and its sub-national counterparts should be well-aligned and mutually strengthening. Provincial and local biodiversity strategies and action plans (PBSAPs and LBSAPs) provide an opportunity to select from and adapt national-level objectives, outcomes and priorities to the provincial or local context, to achieve impact on the ground. In the South African context, it is also important that PBSAPs and LBSAPs be informed by and well-aligned with the other national strategies and frameworks that guide work in the sector.

The information presented in the NBF contributes to achieving this alignment. Furthermore, the NBF recommends a nominal list of acceleration measures that can be used as a starting point to inform the identification of priorities and targets at provincial and local level. Indicators identified in the National Biodiversity Monitoring Framework may also be useful informants of PBSAPs and LBSAPs.

4.3.2. Strengthening multi-stakeholder partnerships

Over the past decade, the biodiversity sector has demonstrated the effectiveness of working through multi-stakeholder (and often cross-sectoral) partnerships that operate at different scales to address biodiversity conservation and social development challenges in an integrated way. These partnerships are a powerful mechanism for co-ordination of the work of the biodiversity sector at sub-national level, across government, private sector and NGO lines and provide excellent opportunities for addressing multiple NBSAP priorities simultaneously. Multi-stakeholder partnership programmes can be determined spatially (landscape-scale initiatives) or thematically (large-scale projects dealing with particular aspects of biodiversity conservation or management), or a combination of these criteria.

Landscape initiatives

Multi-partner, landscape-level initiatives operate in biodiversity priority areas that include a mosaic of land uses and include interventions that operate at a variety of spatial scales. They provide opportunities for broadening stakeholder participation to be more socially inclusive, and to cross sectoral boundaries. They also enable local partnerships and communities of practice to emerge and flourish, and many examples of these exist. Landscape initiatives include corridor programmes (such as the Barberton Tourism and Biodiversity Corridor, BATOBIC), Biosphere Reserves, Marine Hope Spots, and others such as the uMngeni Ecological Infrastructure Partnership and a large number of other projects, many led from within the NGO sector.

Biosphere Reserves are model landscapes for testing the landscape approach to biodiversity conservation and management, and achieving multiple outcomes of the NBSAP and related strategies (such as the People and Parks Strategy of SANParks). They provide practical mechanisms for

integrating protected areas into broader landscapes, reconciling the potentially conflicting interests of diverse stakeholders, and testing and demonstrating diverse approaches such as strengthening biodiversity stewardship, supporting development of Biodiversity Economy Nodes, raising community awareness, and involving people in improved landscape management, with equitable sharing of benefits. Biosphere Reserves hold great potential for leveraging additional capacity for implementation as they operate through collaborative partnerships, often involving a large cohort of volunteers drawn from business, citizen science groups, and the public at large. They hold the additional benefit of being linked to a well-established international programme with clear governance and reporting mechanisms, and have access to a large pool of expertise and best practices that can be adapted for the local context. Although funding is a challenge for local biosphere reserves, being part of the UNESCO MAB programme does facilitate access to a diversity of potential funding avenues, which otherwise would not be available.

It is recommended that support to Biosphere Reserves can be enhanced by:

- (i) Conducting a thematic learning review of the benefits of biosphere reserves and capturing these in appropriate knowledge products to raise the profile of biosphere reserves within government, and the public.
- (ii) Providing support to facilitate more opportunities for lesson-sharing and information exchange between biosphere reserves (involving stakeholders on the ground, as opposed to high-level interactions), including, but not limited to, the possibility of establishing a local chapter of the MAB Youth Forum.

UNDP-supported, GEF-financed multi-partner projects

The implementation of a number of GEF-financed, UNDP supported projects is currently underway in South Africa. These include projects dealing with Biodiversity and Land Use (aligned with NBSAP SO 3), Protected Area Management Effectiveness (NBSAP SO 1), Nagoya Protocol Access & Benefit Sharing (NBSAP SO1), Sustainable Land Management (NBSAP SO2), the Orange River Senqu Basin (regional, with a South African Secretariat; NBSAP SO2), and Operation Phakisa marine governance and protection projects (NBSAP SO 1). These are large, five-year interventions with dedicated resources and governance and implementation capacity, involving multiple stakeholders with a high level of institutional commitment. Support for these initiatives should continue to be prioritised as an effective means of addressing multiple objectives and high priority activities identified in the NBSAP and NBF, through coordinated activity of multiple role-players operating across the broader landscape/seascape.

4.4 Strengthening biodiversity monitoring and reporting

The biodiversity sector in South Africa is well-established, institutionally complex and extremely active. Currently, the conservation outcomes of this activity are not monitored in a consistent way across institutions, or areas of work. Although many institutions have systems for monitoring in place, different sets of indicators are used to monitor the implementation of different strategies in different parts of the sector (though some of the objectives are common), and in different reporting systems (for example, internal reporting such as State of the Environment reporting, and accounting to international bodies such as the Convention on Biological Diversity). This makes it difficult to obtain a clear picture of the impact that the work of the sector is having in terms of conservation outcomes on

the ground (i.e. the state of biodiversity), which, in turn influences work-planning, prioritisation and allocation of resources.

The National Biodiversity Assessment provides a five to seven-yearly assessment of the status of ecosystems and species using high-level headline indicators, but these cannot be used for all monitoring and reporting requirements. The **National Biodiversity Monitoring Framework** has been developed to address this. It identifies an operational set of trackable indicators that can be applied consistently across institutions and reporting processes, to reflect status and trends with respect to biodiversity conservation and management outcomes, on a regular basis. The indicator framework will be updated frequently in response to reporting requirements.

It is recommended that the National Biodiversity Monitoring Framework be adopted and implemented within DEA, national and provincial conservation bodies, and local governments, as a matter of priority, as it will contribute in significant measure to strengthening coordination with respect to biodiversity monitoring, thus improving the effectiveness with which the sector operates.

4.5 Regional priorities and mechanisms for co-ordination

A number of the issues affecting biodiversity conservation and management in South Africa transcend the national boundaries. This means that it is important to identify regional priorities and mechanisms to promote coordinated action on issues of common interest or concern, and build synergy and facilitate lesson-sharing within the Southern African region. South Africa is an active member of the Southern African Development Community (SADC) and the African Union (AU), is a strong supporter of NEPAD (New Partnership for Africa's Development), and an active participant in numerous regional, biodiversity-related initiatives led by international organizations such as the International Union for the Conservation of Nature (IUCN). These provide multiple opportunities for addressing regional issues that influence South Africa's ability to address transboundary threats and risks to biodiversity, maintain the integrity of ecosystems at landscape scale, fulfil the vision of its NBSAP, and contribute meaningfully to ensuring that natural resources continue to provide the basis for socio-economic development in the broader southern African region.

Priorities for regional cooperation are to:

- Strengthen transboundary management of water resources
- Collaborate in combatting illegal wildlife trafficking
- Strengthen development of integrated management and tourism plans for transfrontier conservation areas and transboundary World Heritage Sites, with benefits for developing rural economies
- Improve collaboration and monitoring at border points to reduce biological invasions
- Develop, implement and strengthen programmes to promote international collaboration, sharing of information, technology transfer, and biodiversity training
- Collaborate on the adoption of ecosystem-based approaches to strengthen ecological and social resilience to climate change.

Relevant strategies/mechanisms for promoting regional cooperation and coordination include:

- The SADC Regional Biodiversity Strategy (developed in 2002, and still in effect)

- The AU Guidelines for Co-ordinated implementation of the Nagoya Protocol
- The AU Convention on Natural Resource Conservation
- NEPAD Planning and Coordinating Agency investment programmes, and the NEPAD Strategic Framework (2016 – 2020)
- The Nairobi Workplan on EbA (2015)
- The Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services
- The Peace Parks Foundation Advisory Committee
- The Leadership for Conservation in Africa Initiative (co-led by IUCN, DEA and SANParks)
- The UNP-supported, GEF-financed Senqu Basin project

4.6 Mobilising finance for the biodiversity sector

Limited financial resources (for example, for funding biodiversity stewardship programmes or protected area management) is one of the ongoing challenges compromising the ability of institutions in the biodiversity sector to fulfil their mandates (NBSAP, 2015). Additional resources can be mobilised by: (i) increasing allocations from existing sources (the national fiscus and non-state resources); (ii) improving the effectiveness with which existing funds are used (through more strategic allocations, and reducing costs); and (iii) mobilising resources from new sources (DEA, 2017b: the BIOFIN Plan).

The BIOFIN Biodiversity Finance Plan for South Africa (DEA, 2017b, hereafter referred to as 'the Plan'), has been developed to identify and support the implementation of innovative **biodiversity finance solutions** that augment existing sources of funding from government, the private sector and other sources. The Plan has been developed under the auspices of the UNDP-led Biodiversity Finance Initiative (BIOFIN), being implemented in South Africa through DEA with collaboration of National Treasury. A systematic process and detailed analyses were used to identify and prioritise **15 finance solutions**, each of which has significant impact on aligning incentives, increasing financing, and improving cost effectiveness and service delivery. Collectively – and in combination with strong commitment and financing by the public sector, and technical and financial support of the private sector, foundations, donors, and NGOs – these finance solutions will serve as effective accelerators for strengthening biodiversity management, creating jobs and supporting the achievement of South Africa's development agenda as set out in the National Development Plan, and the global Sustainable Development Goals (SDGs).

Implementation of the Plan will require a coordinated effort and technical capacity from key institutions including the Department of Environmental Affairs (DEA), national and provincial conservation authorities, National Treasury, the South African National Biodiversity Institute (SANBI), a broad range of Non-Government Organizations (NGOs), other government agencies and civil society groups. Monitoring of the Plan will be coordinated by DEA using existing collaborative or new frameworks (DEA, 2017).

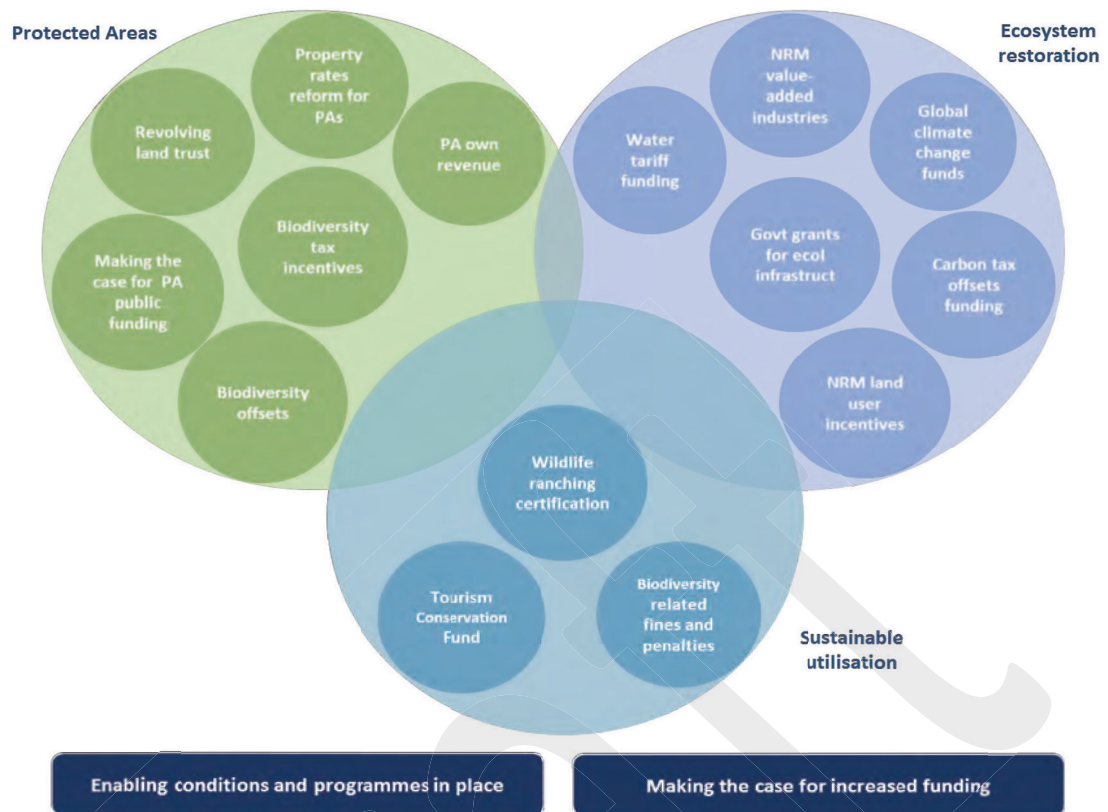

Figure 3: The 15 biodiversity finance solutions proposed in the BIOFIN Finance Plan for South Africa (from DEA, 2017b)

4.7 Implementation and monitoring of the NBF

The Department of Environmental Affairs carries overall responsibility for overseeing implementation and monitoring of the NBF, but catalysing the actions listed in the NBF is the joint responsibility all role-players in the sector. As the NBF is a framework for co-ordination, and not an action plan in itself, its implementation does not have to be monitored in the same way as the NBSAP. However, progress should be reported regularly at MinTech WG1 meetings.

Section 6: Annexures

- 6.1. List of strategies and frameworks reviewed in the NBF
- 6.2. References
- 6.3. The 17 Sustainable Development Goals (SDGs)
- 6.4. The 20 Aichi Biodiversity Targets (ABTs)
- 6.5. Acronyms and abbreviations

Draft

Annexure 6.1: List of strategies, frameworks and systems included in the overview presented in the National Biodiversity Framework

The strategies are listed in the sequence in which they appear in Table 4. Where they are commonly referred to in abbreviated form, the abbreviation appears at the start of the reference, followed by full citation details, where these apply. Active weblinks are provided to enable easy access by users.

Annexure 6.3: The Sustainable Development Goals (or Global Goals)

SDG	Description
1	End poverty in all its forms everywhere
2	End hunger, achieve food security and improved nutrition and promote sustainable agriculture
3	Ensure healthy lives and promote well-being for all at all ages
4	Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all
5	Achieve gender equality and empower all women and girls
6	Ensure availability and sustainable management of water and sanitation for all
7	Ensure access to affordable, reliable, sustainable and modern energy for all
8	Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all
9	Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation
10	Reduce inequality in and among countries
11	Make cities and human settlements inclusive, safe, resilient and sustainable
12	Ensure sustainable consumption and production (SCP) patterns
13	Take urgent action to combat climate change and its impacts
14	Conserve and sustainably use the oceans, seas and marine resources for sustainable development
15	Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss
16	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels
17	Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development

For a full description of the goals, their targets and indicators, visit:

<http://www.un.org/sustainabledevelopment/sustainable-development-goals/>

Annexure 6. 4: The Aichi Biodiversity Targets

CBD Strategic Goal	Target	Description
A: Address the underlying causes of biodiversity loss by mainstreaming biodiversity across government and society	1	Awareness of biodiversity increased
	2	Biodiversity values integrated
	3	Incentives reformed
	4	Sustainable consumption and production
B: Reduce the direct pressures on biodiversity and promote sustainable use	5	Habitat loss halved or reduced
	6	Sustainable management of aquatic resources
	7	Sustainable agriculture, aquaculture and forestry
	8	Pollution reduced
	9	Invasive alien species prevented and controlled
	10	Ecosystems vulnerable to climate change
C: Improve the status of biodiversity by safeguarding ecosystems, species and genetic diversity	11	Protected areas
	12	Reducing the risk of extinction
	13	Safeguarding genetic diversity
D: Enhance the benefits to all from biodiversity and ecosystem services	14	Ecosystem services
	15	Ecosystem restoration and resilience
	16	Access to sharing benefits from genetic resources
E: Enhance implementation through participatory planning, knowledge management and capacity building	17	Biodiversity strategies and action plans
	18	Traditional knowledge
	19	Sharing information and knowledge

For full descriptions of the goals, their targets and indicators, visit: www.cbd.int

Annexure 6.5: Acronyms and Abbreviations

ABT	Aichi Biodiversity Target
ACT	African Conservation Trust
ARC	Agricultural Research Council
AU	African Union
BDS TWG	Biodiversity Stewardship Technical Working Group
BHCDS	Biodiversity Human Capital Development Strategy
BioPANZA	Bioproducts Advancement Network of South Africa
BotSoc	The Botanical Society of South Africa
CATHSSETA	Culture, Arts, Tourism, Hospitality and Sport Sector Education Training Authority
CBD	Convention on Biological Diversity
CBNRM	Community-based Natural Resource Management
CBO	Community-based Organisation
CITES	Convention on International Trade in Endangered Species
CMA	Catchment Management Agency
CoGTA	Department of Cooperative Governance and Traditional Affairs
CPA	Community Property Association
CSIR	Council for Scientific and Industrial Research
DAC	Department of Arts and Culture
DAFF	Department of Agriculture, Forestry and Fisheries
DARDLEA	Department of Agriculture, Rural Development, and Environmental Affairs
DBSA	The Development Bank of Southern Africa
DEA	The Department of Environmental Affairs
DEA&DP	Department of Environmental Affairs and Development Planning (Western Cape)

National Biodiversity Framework

January 2018

DEDEAT	Department of Economic Development, Environment and Tourism (Eastern Cape)
DEDTEA	Department of Economic Development, Tourism and Environment Affairs (KwaZulu-Natal)
DENC	Department of Environment and Nature Conservation (Northern Cape)
DHET	The Department of Higher Education and Training
DIRCO	The Department of International Relations and Cooperation
DMR	The Department of Mineral Resources
DoE	The Department of Energy
DoH	The Department of Health
DOJ&CD	The Department of Justice and Constitutional Development
DRDLR	Department of Rural Development and Land Reform
DST	Department of Science and Technology
dti	Department of Trade and Industry
DWS	Department of Water and Sanitation
EA(P)	Environmental Assessment (Practitioner)
EbA	Ecosystem-based Adaptation
ECPTA	Eastern Cape Parks and Tourism Authority
EIA	Environmental Impact Assessment
EKZNW	Ezemvelo KZN Wildlife
EMI	Environmental Monitoring Inspectorate/Inspector
ENRM	Environmental and Natural Resource Management
EPWP	Expanded Public Works Programme
EWT	Endangered Wildlife Trust
FEPA	Freshwater Ecosystem Priority Area
GDARD	Gauteng Department of Agriculture and Rural Development
GDP	Gross Domestic Product
GEF	Global Environment Facility
GIS	Geographic Information System
GSPC	Global Species Conservation Programme
ICLEI	Local Governments for Sustainability
IDP	Integrated Development Plan
IPBES	Intergovernmental Platform for Biodiversity And Ecosystem Services
IUCN	International Union for the Conservation of Nature
LBSAP	Local Biodiversity Strategy and Action Plan
LEDET	Limpopo Department of Economic Development, Environment and Tourism
LRBSI	Land Reform and Biodiversity Stewardship Initiative
LTPB	Limpopo Tourism and Parks Board
MAB	Man and Biosphere (Programme)
MEC	Member of the Executive Council
MinMEC	Minister and Members of the Executive Councils Committee
MinTECH	Ministerial Technical Committee
MTSF	Medium Term Strategic Framework
NAP	National Action Plan
NBA	National Biodiversity Assessment
NBBN	National Business and Biodiversity Network
NBES	National Biodiversity Economy Strategy
NBF	National Biodiversity Framework
NBG	National Botanical Garden
NBIS	National Biodiversity Information System

National Biodiversity Framework

January 2018

NBSAP	National Biodiversity Strategy and Action Plan
